**The Autocar** ,1974-11    **Groundwater-Surface Water Interactions** Habil. Jörg Lewandowski,Karin Meinikmann,Stefan Krause,2020-12-10 Recent years have seen a paradigm shift in our understanding of groundwater surface water interactions surface water and aquifers were long considered discrete separate entities they are now understood as integral components of a surface subsurface continuum This book provides an overview of current research advances and innovative approaches in groundwater surface water interactions The 20 research articles and 1 communication cover a wide range of thematic scopes scales and experimental and modelling methods across different disciplines hydrology aquatic ecology biogeochemistry and environmental pollution The book identifies current knowledge gaps and reveals the challenges in establishing standardized measurement observation and assessment approaches It includes current hot topics with environmental and societal relevance such as eutrophication retention of legacy and emerging pollutants e g pharmaceuticals and microplastics urban water interfaces and climate change impacts The book demonstrates the relevance of processes at groundwater surface water interfaces for 1 regional water balances and 2 quality and quantity of drinking water resources As such this book represents the long awaited transfer of the above mentioned paradigm shift in understanding of groundwater surface water interactions from science to practice    **City Farmer** Lorraine Johnson,2011 City Farmer celebrates the new ways that urban dwellers are getting closer to their food Not only are backyard vegetable plots popping up in places long reserved for lawns but some renegades are even planting their front yards with food People in apartments are filling their balconies with pots of tomatoes beans and basil while others are gazing skyward and greening their rooftops with food plants Still others are colonizing public spaces staking out territory in parks for community gardens and orchards or convincing school boards to turn asphalt school grounds into growing grounds Woven through the book are the stories of

guerrilla urban farmers in various cities of North America who are tapping city trees for syrup gleaning fruit from parks foraging for greens in abandoned lots planting heritage vegetables on the boulevard and otherwise placing food production at the centre of the urban community Additional stories describe the history of urban food production in North America revealing the roots of our current hunger for more connection with our food and the visionaries who have directed that hunger into action Throughout the book sidebars offer practical tips for how to compost how to convert a lawn into a vegetable bed and what edible plants are easy to grow with children among other topics

**Modeling and Simulation for RF System Design** Ronny Frevert, Joachim Haase, Roland Jancke, Uwe Knochel, Peter Schwarz, Ralf Kakerow, Mohsen Darianian, 2006-06-28 Modern telecommunication systems are highly complex from an algorithmic point of view The complexity continues to increase due to advanced modulation schemes multiple protocols and standards as well as additional functionality such as personal organizers or navigation aids To have short and reliable design cycles efficient verification methods and tools are necessary Modeling and simulation need to accompany the design steps from the specification to the overall system verification in order to bridge the gaps between system specification system simulation and circuit level simulation Very high carrier frequencies together with long observation periods result in extremely large computation times and requires therefore specialized modeling methods and simulation tools on all design levels The focus of Modeling and Simulation for RF System Design lies on RF specific modeling and simulation methods and the consideration of system and circuit level descriptions It contains application oriented training material for RF designers which combines the presentation of a mixed signal design flow an introduction into the powerful standardized hardware description languages VHDL AMS and Verilog A and the application of commercially available simulators Modeling and Simulation for RF System Design is addressed to graduate students and industrial professionals who are engaged in communication system design and want to gain insight into the system structure by own simulation experiences The authors are experts in design modeling and simulation of communication systems engaged at the Nokia Research Center Bochum Germany and the Fraunhofer Institute for Integrated Circuits Branch Lab Design Automation Dresden Germany

Using Neurophysiological Signals that Reflect Cognitive or Affective State Anne-Marie Brouwer, Thorsten O. Zander, Jan B. F. van Erp, 2015-07-27 What can we learn from spontaneously occurring brain and other physiological signals about an individual's cognitive and affective state and how can we make use of this information One line of research that is actively involved with this question is Passive Brain Computer Interfaces BCI To date most BCIs are aimed at assisting patients for whom brain signals could form an alternative output channel as opposed to more common human output channels like speech and moving the hands However brain signals possibly in combination with other physiological signals also form an output channel above and beyond the more usual ones they can potentially provide continuous online information about an individual's cognitive and affective state without the need of conscious or effortful communication The provided information could be used in a number of ways Examples include

monitoring cognitive workload through EEG and skin conductance for adaptive automation or using ERPs in response to errors to correct for a behavioral response While Passive BCIs make use of online neuro physiological responses and close the interaction cycle between a user and a computer system neuro physiological responses can also be used in an offline fashion Examples of this include detecting amygdala responses for neuromarketing and measuring EEG and pupil dilation as indicators of mental effort for optimizing information systems The described field of applied neuro physiology can strongly benefit from high quality scientific studies that control for confounding factors and use proper comparison conditions Another area of relevance is ethics ranging from dubious product claims acceptance of the technology by the general public privacy of users to possible effects that these kinds of applications may have on society as a whole In this Research Topic we aimed to publish studies of the highest scientific quality that are directed towards applications that utilize spontaneously effortlessly generated neurophysiological signals brain and or other physiological signals reflecting cognitive or affective state We especially welcomed studies that describe specific real world applications demonstrating a significant benefit compared to standard applications We also invited original new kinds of proposed applications in this area as well as comprehensive review articles that point out what is and what is not possible according to scientific standards in this field Finally we welcomed manuscripts on the ethical issues that are involved Connected to the Research Topic was a workshop held on June 6 during the Fifth International Brain Computer Interface Meeting June 3 7 2013 Asilomar California that brought together a diverse group of people who were working in this field We discussed the state of the art and formulated major challenges as reflected in the first paper of the Research Topic **Moody's International Manual** ,1995

**Traditional Construction for a Sustainable Future** Carole Ryan,2011-01-13 Since the spread of classical design and construction amongst the upper echolons of British society in the late seventeenth century traditional construction methods have largely fallen by the wayside Centuries later as the construction industry faces up to its environmental responsibilities this book explores its rich and ancient tradition to provide tried and trusted solutions to modern day construction problems By way of introduction the ancient and historical lifestyles that dictated the nature of traditional construction are explored before focussing on its health and ecological benefits As well as cultural background this book includes a detailed scientific description of traditional building materials and their constituents which draws a sharp contrast with modern petrochemical based materials The studies of traditional buildings included reveal the sustainability of features such as natural ventilation and breathing walls and comparisons with modern construction methods show how they could prevent sick building syndrome The author argues that maintenance for long life by contrast with the modern concept of life cycle costing is at the nub of sustainability and underlies the contribution traditional building construction can make to tackling climate change Over 250 original photos and over fifty bespoke diagrams illustrate the features techniques and characteristics of traditional construction that could make such a valuable contribution to the industry today The inclusion of a close study of how these

methods relate to British building regulations makes this book a practical guide for construction professionals as well as an authoritative resource for students and policy makers      **Journal of the National Cancer Institute** ,1993-07 Each issue is packed with extensive news about important cancer related science policy politics and people Plus there are editorials and reviews by experts in the field book reviews and commentary on timely topics      **Eye Tracking** Samuel Stuart,2022-06-20 This volume explores the latest eye tracking methodologies that help researchers understand the background methods and applications involved in these studies The chapters in this book cover topics such as methods and models of eye tracking in natural environments natural gaze informatics i e assisted wheelchair mobility eye tracking application to understand the visual control of locomotion eye movement in neurological disorders and eye movements in sports research and practice In the Neuromethods series style chapters include the kind of detail and key advice from the specialists needed to get successful results in your laboratory Cutting edge and practical Eye Tracking Background Methods and Applications is a valuable resource for experienced and novice researchers interested in learning more about this field and its future developments      **Organic Waste Recycling: Technology, Management and Sustainability** Chongrak Polprasert,Thammarat Koottatep,2017-06-15 This fourth edition of Organic Waste Recycling is fully updated with new material to create a comprehensive and accessible textbook New chapter on constructed wetlands for wastewater and faecal sludge stabilization New sections on waste recycling vs climate change and water faecal sludge and its characteristics hydrothermal carbonization technology up to date environmental criteria and legislation and environmental risk assessment New case studies with emphasis on practices in both developed and developing countries have been included along with more exercises at the end of chapters to help the readers understand the technical principles and their application Novel concepts and strategies of waste management are presented Up to date research findings and innovative technologies of waste recycling program are provided This textbook is intended for undergraduate and graduate students majoring in environmental sciences and engineering as well as researchers professionals and policy makers who conduct research and practices in the related fields It is essential reading for experts in environmental science and engineering and sustainable waste reuse and recycling in both developed and developing countries      *Palliative Care in Neurology, Volume II* Raymond Voltz,Marianne De Visser,David John Oliver,2022-03-11
