

VCE Psychology: Sample teaching plan

Sample Course Outline – VCE Psychology Unit 1: How are behaviour and mental processes shaped?

Note: This is a sample guide only and indicates one way to present the content from the VCE Psychology Study Design over the weeks in each school term. Teachers are advised to consider their own contexts in developing learning activities. Which local fieldwork sites would support learning in the topic area? Which local issues lend themselves to debate and investigation? Which experiments can students complete within the resource limitations of their learning environments?

Week	Area	Topics	Learning activities
1	How does the brain function?	Role of the brain in mental processes and behaviour (Influence of difference approaches over time to understanding the role of the brain; brain structure and function of the central and peripheral nervous systems; role of the neuron; basic structure and function of the hindbrain, midbrain and forebrain; role of the cerebral cortex)	<ul style="list-style-type: none"> introduction to psychology: design and conduct an investigation to test the capacity of phrenology to predict personality; use the findings to discuss how the nature of 'psychology' has changed over time dissect a sheep's brain; identify the hindbrain, midbrain and the forebrain (lamb's brains may be purchased from supermarkets or from a butcher), or conduct a virtual dissection through the Whole Brain Atlas website make a 'brain hat' using plasticine, papier mache, a hollowed-out half watermelon rind or other suitable modelling materials and label the external features and sections of the brain; work in groups to produce plans for an adaptation of the 'brain hat' that shows vertical and horizontal cross-sections of the brain
2			
3			
4			
5		Brain plasticity and brain damage (infancy and adolescence as periods of rapid development and changes in brain structure and function; impact of injury to the cerebral cortex; ability of brain to undergo adaptive plasticity; use of animal studies and neuroimaging techniques to develop understanding of human neurological disorders)	<ul style="list-style-type: none"> list the main functions of the spinal cord; investigate how injury or disease involving the spinal cord affects functionality demonstrate human brain plasticity using mirror drawing divide class into six groups; each group of students researches the development of myelin, synaptic pruning and frontal lobe development in infancy and adolescence; each group then presents their examples to the class; other class members use a data sheet to record information and responses using photographs from internet, compare the brain structures of other mammals such as a sheep and a mouse to a human brain; discuss how animal models can be used to understand human neurological disorders
