

## SUPPLEMENTARY INFORMATION

The Owner's Manual and other manuals contain safety instructions and all warning, caution and note texts, which must be read. Some functions only apply to certain markets.

### WARNING

#### GETTING STARTED

**Voive On Call** – The system's services only work in areas in which Voive On Call's partners have cellular coverage and in markets where Voive On Call is available.

Just as with cellular phones, atmospheric disturbances or areas with fewer transmissions, e.g. sparsely populated rural areas, can make connection impossible.

For warning, caution and note texts for Voive On Call services, see the Owner's Manual and the applicable agreement for the Voive On Call subscription.

**Sensor Navigation**<sup>1</sup> – Direct all your attention to the road and make sure that your concentration is focused on driving. Follow applicable traffic laws and use good judgment while driving. Road conditions can be affected by weather or season, which may make certain recommendations less reliable.

#### EXTERIOR OVERVIEW

**Tailgate** – Bear in mind the risk of pinching when opening/closing the tailgate. Make sure that no one is in the path of the tailgate who could be injured by its movement. Always operate the tailgate with caution.

**Keyless locking/unlocking**<sup>1</sup> – Check that children or other passengers are not at risk of crushing when all the windows are closed with keyless closing<sup>2</sup>.

#### INTERIOR OVERVIEW

**Passenger airbag** – Volvo recommends that all occupants (adults and children) shorter than

160 cm (4 feet 7 inches) be seated in the rear seat of any vehicle with a front passenger side airbag and be properly restrained for their height and weight.

#### Occupant Weight Sensor (OWS)

- No objects that add to the total weight on the seat should be placed on the front passenger's seat. If a child is seated in the front passenger's seat with any additional weight, this extra weight could cause the OWS system to enable the airbag, which might cause it to deploy in the event of a collision, thereby injuring the child.
- The seat belt should never be wrapped around an object on the front passenger's seat. This could interfere with the OWS system's function.
- The front passenger's seat belt should never be used in a way that exerts more pressure on the passenger than normal. This could increase the pressure exerted on the weight sensor by a child, and could result in the airbag being enabled, which might cause it to deploy in the event of a collision, thereby injuring the child.

Always take the **remote key** with you when you leave the vehicle. Make sure the ignition is in mode **0**, especially if there are children in the vehicle.

Always apply the **parking brake** when parking on an incline. Selecting a gear or putting the automatic transmission in **P** may not be sufficient to keep the vehicle stationary in all situations.

#### CHARGING THE HYBRID BATTERY

- Charging the hybrid battery may only be done from approved, grounded 120/240 V outlets (AC, alternating current), if the electrical circuit or electrical socket's capacity is not known, let a licensed electrician inspect the electrical circuit's capacity. Using a charge level that exceeds the electrical circuit's or electrical outlet's capacity may start a fire or damage the electrical circuit.
- The charging cable must be grounded when in use. It is equipped with a cord with a ground-

ing conductor and a grounding plug. The plug must be inserted into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances and is not damaged in any way.

- Children should be supervised when in the vicinity of the charging cable when it is plugged in.
  - The charging cable and its components must not be rinsed or immersed in water.
  - High voltage is present in your electric meter housing and power distribution service panel. Contact with high voltage can cause death or serious personal injury.
  - Do not use the charging cable if it is damaged in any way. A damaged or malfunctioning charging cable may only be repaired by a workshop – an authorized Volvo workshop is recommended.
  - Always position the charging cable so that it will not be driven over, stepped on, tripped over or otherwise damaged, or cause personal injury.
  - Disconnect the charger from the wall outlet before cleaning it.
  - Never connect the charging cable to an extension cord or a multiple plug socket.
  - Avoid visibly worn or damaged electrical outlets since they may lead to fire damage and/or personal injury if used.
  - Do not use one or more adapters between the charging cable and the electric outlet.
  - Do not use an extension timer between the charging cable and the electrical outlet.
- Also, refer to the manufacturer's instructions for using the charging cable and its components.

#### POWER FRONT SEATS

Do not adjust the seat while driving. The seat must be positioned in a way that allows the driver to fully depress the brake pedal. Adjust the seat as far rearward as comfort and control allow. After adjusting the seat, make sure that it is securely locked into position before starting to drive.

#### FOLDING THE BACKRESTS IN THE REAR SEAT

Make sure the backrest is correctly engaged before folding up and down and that the head restraint is correctly engaged after folding up.

#### CONNECTIONS

- Do not use accessories with large or heavy plugs – they could damage the outlet or come loose while you are driving.
- Do not use accessories that could cause disruptions to e.g. the vehicle's radio receiver or electrical system.
- Position the accessory so that there is no risk of it injuring the driver or passengers in the event of heavy braking or a collision.
- Pay attention to connected accessories as they can generate heat that could burn passengers or the interior.

#### DRIVER SUPPORT

The vehicle's driver support systems are designed to offer supplementary assistance to the driver, but cannot handle all situations in all traffic, weather and road conditions. They are never a substitute for the driver's attention and judgment. The driver is always responsible for ensuring the vehicle is driven in a safe manner, at the appropriate speed, with an appropriate distance to other vehicles, and in accordance with current traffic rules and regulations. The driver always has ultimate responsibility for braking and steering the vehicle.

Before driving your vehicle, read all sections of the Owner's Manual concerning driver support systems in the vehicle.

#### PARKING ASSISTANCE SYSTEMS

**Park Assist Pilot** is a supplementary driver support but cannot handle all situations. The function is only intended to assist the driver when parallel and perpendicular parking. The driver bears full responsibility for parking the vehicle safely and braking when necessary. Objects located far into the parking space may not be detected when scanning. The driver is always responsible for assessing whether the space
