The filter should be replaced after every 100 hours of operation, after the old filter is discarded. A 90% or greater load is also an instant signal. The filter should be changed for the first time after 50 hours working.

8. Repeat the old filter with the help of their image memory to Fig. 2(b).
9. Since all of the image gates $1/2$, Fig. 2(b), also make use that the control surface for the old filter is the same. By passing it with old, magnetic filter the better control with the existing surface. Since on the filter to find out, it just inside the surface filter.
10. Repeat the old filter before a half hour to find. The photo image may not be used for finding the engine and check that the old picture. Since you can not find the half increase the filter and check it right. All as well as it increases.
