O'Leary/Dennis S. O'Leary,2016-02-04 Across the span of more than forty years Raphael Dorman O Leary a professor of English rhetoric and English literature taught his students at the University of Kansas to think straight to put sinew into their sentences and to embrace the magnificent literary treasures of their mother tongue The English Professor by authors Margaret R O Leary and Dennis S O Leary offers a narrative of the life work and times of a revered Midwestern university English teacher This memoir narrates how the professor born in 1866 was raised on a Kansas farm in the post bellum era Like his father before him he was committed to a life of learning and teaching His colleagues knew him for his unpretentious exterior honesty and integrity and his flashing anger at cheapness vulgarity pretense and above all charlatanism When Professor O Leary died after a short illness in 1936 his personal effects passed through two generations to his grandson Dennis S O Leary who with his wife Margaret discovered his papers while restoring a family house The trove of material served as the core resource for the compilation of The English Professor It provides insights into the histories of Kansas and the University of Kansas and of Harvard University as well as perspectives on higher education including the teaching of English rhetoric language literature journalism and oratory in the United States      *Grading Student Achievement in Higher Education* Mantz Yorke,2007-09-12 A lot hangs on the summative grades that students are given A good degree opens doors which otherwise might remain closed Yet as higher education is now a mass rather than an elite system what is expected of its graduates is different from the expectations of previous generations Students are expected not only to be able to demonstrate high standards of academic achievement but also a variety of capabilities that have at different times been given labels such as generic skills and transferable skills These abilities are difficult to grade for a variety of reasons and some graduates may be losing out because their particular strengths are given insufficient acknowledgement in current summative assessment practices Using the UK honours degree classifications as a case study this book appraises the way in which summative assessment in higher education is approached and shows that the foundations of current practices in the UK and elsewhere are of questionable robustness It argues that there is a need to

widen the assessment frame if the breadth of valued student achievements is to be recognised adequately Victoria Education Gazette and Teachers' Aid ,1939 *Research in Education* ,1974 *Energy Research Abstracts* ,1993
