Nevárez,2013-12-03 This collection of original essays presents pedagogical tools methods and approaches for incorporating the figure of the vampire into the learning environment of the college classroom in the hopes of ushering the Undead out of the coffin and into the classroom The essays foster interdisciplinary collaboration and dialogue and serve as a collective resource for those currently teaching the vampire as well as newcomers to vampire studies Opening with a foreword by Sam George the collection is organized around such topics as historicizing the vampire teaching the diverse vampire and engaging the student learner Interwoven

throughout the volume are strategies for incorporating writing instruction and generating conversations about texts texts defined broadly so as to include film and other media The vampire allows instructors to explore timeless themes such as life and death love and passion immortality and monstrosity and Otherness Twenty-First-Century Gothic Brigid Cherry, Peter Howell, Caroline Ruddell, 2020-05-15 The essays in this volume reinterpret and contest the Gothic cultural inheritance each from a specifically twenty first century perspective Most are based on papers delivered at a conference held appropriately in Horace Walpole s Gothic mansion at Strawberry Hill in West London which is usually seen as the geographical origin of the first but not the last of the many Gothic revivals of the past 300 years In a contemporary context the Gothic sensibility could be seen as a mode particularly applicable to the frightening instability of the world in which we find ourselves at the beginning of the twenty first century The truth is probably less epochal that Gothic never went away when were we ever without fear or at least has persisted since its resurgence in the late nineteenth century Gothic is at least as modern as it is ancient and each essay in this collection contributes to current scholarship on the Gothic by exploring a particular aspect of Gothic s contemporaneity The volume contains papers on horror novels and cinema poetry popular music and fan cultures

Worldbuilding for Game Designers Steve Dee, 2025-06-02 Our modern world is dominated by giant media companies and increasingly they don't so much sell story characters or gameplay as they do their setting. Fictional worlds are big business and represent big value to companies and audiences alike and they are increasingly expected and demanded by both. As yet however the art of building worlds has been only taught to writers of novels or films. The same worlds are frequently used across different modes of media but successfully adapting them to games or building them for this purpose requires a specific approach. Unlike all other artforms games mandate participation with the audience stepping into the world of the game and taking on the roles that the rules and pieces demand of them. Likewise whenever an audience engages with a fictional world they are inherently playing a game of make believe and imagining themselves within a different context. This makes world building and gaming a perfect match with each element giving more power to the other. This book unlocks exactly how the two disciplines are entwined and work together and how a designer can harness that synergy to the best effect. The text is composed of short focused chapters that explain every step of building a compelling world from getting your first ideas to moving towards publication. It also provides a deeper understanding of the how and why of world creation and why worlds have so much power over us as players and as people. Covers every step of world creation from getting ideas to seeking publication. A comprehensive analysis of the field. Inspirational tricks to break blocks or find new angles. Practical exercises at the end of every chapter. Simple and accessible for every kind of game or game designer

Creating Second Lives Astrid Ensslin, Eben Muse, 2011-05-09 This book aims to provide insights into how second lives in the sense of virtual identities and communities are constructed textually semiotically and discursively specifically in the online environment. Second Life and Massively Multiplayer Online Games such as World of Warcraft. The book's philosophy is multi disciplinary and its goal is to explore the question of how we as gamers and residents of virtual worlds construct alternative online realities in a variety of ways. Of particular significance to this endeavour are conceptions of the body in cyberspace and of spatiality which manifests itself in natural and built environments as well as the triad of space place and landscape. The contributors disciplinary backgrounds include media communication cultural and literary studies and they examine issues of reception and production identity community gender spatiality natural and built environments using a plethora of methodological approaches ranging from theoretical and philosophical contemplation through social semiotics to corpus based discourse analysis

Fantasy and Belief Danielle Kirby, 2014-09-19 Religion and spirituality are being transformed in our late modern and secularising times. New forms of belief proliferate often notable for not being limited to traditional systems of reference or expression. Increasingly these new religions present worldviews which draw directly upon popular culture or occulture in fiction film art and the internet. Fantasy and Belief explores the context and implications of these types of beliefs through the example of the Otherkin

community The Otherkin are a loosely affiliated group who believe themselves to be in some way more than just human their non humanity often rooted in the characters and narratives of popular fantasy and science fiction Challenging much current sociological thinking about spirituality and consumption Fantasy and Belief reveals how popular occulture operates to recycle develop and disseminate metaphysical ideas and how the popular and the sacred are combining in new ways in today s world
