*Vastu Architecture* Michael Borden, 2011-09-16 This book about the science of Vastu was written as a simple and clear yet detailed exposition on the knowledge and basic technical applications for the design of secular Vastu buildings such as homes and offices Vastu Architecture provides the reader with a nuts and bolts explanation of how to create a solid structure that is in resonance with Earth Cosmic and Divine energies Being a fully illustrated book with around 100 simple clear and easy to interpret drawings the book is very accessible to a general audience and does not require any background knowledge in architectural design Also included are two complete floor plans that can be tailored for specific individuals in accordance with their birth stars Many other books about Vastu do not include an explanation of the technical knowledge of Vastu science and if they do they often present only a partial or an altogether incorrect account thereof This is not the case with Vastu Architecture as its technically rich yet layman accessible knowledge base provides the reader with all of the basic requirements to create a Vastu structure including a very clear chapter on how to use the Ayadi Calculations to get the Sacred Dimensions of a building This is not however a coffee table book it is rather a manual for the construction of special havens for the soul Also see the supplemental book in this series Vastu Architecture Project Plans and Illustrations Vol 1 by the same author

Engaging with the burgeoning cross disciplinary interest in home since the first edition was published this significantly revised and updated second edition contains new research boxes illustrations and contemporary examples throughout It also adds a new chapter on Home and the City that extends the scalar understanding of home to the urban The book develops the conceptual and methodological underpinnings of a critical geography of home drawing on key feminist postcolonial and housing thinkers as well as contemporary methodological currents in non representational thinking and performance The book s chapters consider the making and unmaking of home across the domestic scale house as home the urban city as home national nation as home and homemaking in relation to transnational migration and diaspora Each chapter includes illustrative examples from diverse geographical contexts and historical time periods Chapters also address some of the key cross cutting dimensions of home across these scales including digital connectivity art and performance more than human constructions of home and violence and dispossession The book ends with a research agenda for home in a world of COVID 19 The book provides an understanding of home that has three intersecting dimensions that material and imaginative geographies of home are closely intertwined that home power and identity are intimately linked and that geographies of home are multi scalar This framework the examples used to illustrate it and the intended audience of academics and students across the humanities and social sciences will together shape the field of home studies into the future
