The Interlopers Vera Keller, 2023-04-18 A reframing of how scientific knowledge was produced in the early modern world Winner of the Phyllis Goodhart Gordan Book Prize by the Renaissance Society of America Shortlisted for the Pfizer Award by the History of Science Society Many accounts of the scientific revolution portray it as a time when scientists disciplined knowledge by first disciplining their own behavior According to these views scientists such as Francis Bacon produced certain knowledge by pacifying their emotions and concentrating on method In *The Interlopers* Vera Keller rejects this emphasis on discipline and instead argues that what distinguished early modernity was a navigation away from restraint and toward the violent blending of knowledge from across society and around the globe Keller follows early seventeenth century English projectors as they traversed the world pursuing outrageous entrepreneurial schemes along the way These interlopers were developing a different culture of knowledge one that aimed to take advantage of the disorder created by the rise of science and technological advances They sought to deploy the first submarine in the Indian Ocean raise silkworms in Virginia and establish the English slave trade These projectors developed a culture of extreme risk taking uniting global capitalism with martial values of violent conquest They saw the world as a riskscape of empty spaces disposable people and unlimited resources By analyzing the disasters as well as a few successes of the interlopers she studies Keller offers a new interpretation of the nature of early modern knowledge itself While many influential accounts of the period characterize European modernity as a disciplining or civilizing process *The Interlopers* argues that early modernity instead entailed a great undisciplining that entangled capitalism colonialism and science
