On a Global Mission: The Automobiles of General Motors International Volume 3 Louis F. Fourie, 2016-12-27
Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

The Sensitivity Principle in Epistemology Kelly Becker, Tim Black, 2012-08-02
The sensitivity principle is a compelling idea in epistemology and is typically characterized as a necessary condition for knowledge. This collection of thirteen new essays constitutes a state of the art discussion of this important principle. Some of the essays build on and strengthen sensitivity based accounts of knowledge and offer novel defences of those accounts. Others present original objections to sensitivity based accounts, objections that must be taken seriously even by those who defend enhanced versions of sensitivity and offer comprehensive analysis and discussion of sensitivity's virtues and problems. The resulting collection will stimulate new debate about the sensitivity principle and will be of great interest and value to scholars and advanced students of epistemology.

Night Stalker John McShane, 2011-06-23
The Night Stalker first struck in 1992, raping an 84-year-old woman in her bungalow in Croydon. What followed was a sickening series of horrifying sexual assaults on elderly victims across south London, Kent and Surrey. All the victims lived alone and were woken in the night by a man dressed in black, his face obscured by a balaclava. He would shine a torch into their eyes or switch off their electricity before subjecting them to terrifyingly violent attacks. Detectives at one stage compiled a list of 21,000 possible suspects before officers working on Operation Minstead finally made a dramatic arrest in the dead of night, led by SIO Colin Sutton. This is the full account of the man dubbed the Night Stalker and the harrowing stories of his South London victims.
