

## Finding a Job

### Career Versus Job

"Oh, no—Monday morning again!" Have you ever heard this before? It sounds like someone is cranking away at a job that she or he doesn't like! You know you don't want a dead-end job. But what is a career? The difference between a career and a job is subtle, but the impact can be dramatic. A job is a set of tasks performed in exchange for payment, and it may or may not be fulfilling. It is a means to an end, the end generally being to make money to pay the bills. A career is an occupation or the life work you plan or toward which you strive. It is generally thought to be fulfilling and uses your abilities in a way that is meaningful to you and to society.

It's not easy deciding the direction in which you want to go or whether you are willing to put in the work necessary to begin a journey toward a fulfilling career. Here are a few questions you can answer to start you on your way:

- What are your passions, or the things for which you have strong feelings?
- What are your talents? In which areas do you have an aptitude or an easy grasp?
- Which adults do you admire, not only for who they are, but also for what they do every day?

Ask yourself what is important to you, and the answer may hold the key to a fulfilling career for your future. Career aptitude tests can be helpful as well, such as the popular Myers-Briggs Type Indicator® (MBTI) that many schools offer for free.

### Training and Education

You may believe that you know what you want to do, and you may believe that you'd be very good at it. Unfortunately, you can't just go to the president of a company and say that you are the right person for the job. That would be way too easy! Embarking on a career takes specialized knowledge. To prove that you possess that knowledge, you will likely need to earn a degree, whether the degree is two-year, four-year, or advanced.

Many careers are closed to people who have not obtained a degree or training in the field. Once you've decided in what direction you'd like your career to go, then find out what level of education is required to get there. In the computer exercise at the end of this chapter, you will discover how having a degree makes a big difference in the types of jobs (and, therefore, the salaries) for which you qualify.

An associate's degree generally takes two years of study and is awarded by a community, junior, or business college. You can earn the
