

2020 VCE Biology examination report

General comments

In 2020 the Victorian Curriculum and Assessment Authority produced an examination based on the adjusted 'Biology Study Design for 2020 only'. The examination provided students with the opportunity to demonstrate and apply a range of knowledge and skills.

This year, there was an extremely low number of questions not attempted by students. The paper gave guidance to and space for students to respond. It is important that students use the reading time to analyse each question, relate to experiences gained during the year and formulate answers to address each question's requirements.

Section B requires students to complete their answers in pen and write within the marked boundaries for each page so that the best image of the paper is obtained when it is scanned. Students can use pencil for questions that require a diagram or labelling, such as Question 2a. When a question asks for a name, such as in Questions 1bi., 4ai. or 7a., that is all that is required. However, when an explanation or description is required, students should provide information that is not given in the stem of the question.

Questions with three or more marks allocated generally require students to develop a considered response and articulate their answer. Students should use the information in the question, the marks available and the space provided when formulating their response.

Specific information

This report provides sample answers or an indication of what answers may have included. Unless otherwise stated, these are not intended to be exemplary or complete responses.

The statistics in this report may be subject to rounding resulting in a total more or less than 100 per cent.

Vce Biology Unit 2 Course Outline Heineman
