The Publications of the Harleian Society , 1894 Information Retrieval Technology Pu-Jen Cheng, Min-Yen Kan, Wai Lam, Preslav Nakov, 2010-12-06 The Asia Information Retrieval Societies Conference AIRS 2010 was the sixth conference in the AIRS series aiming to bring together international researchers and developers to exchange new ideas and the latest results in information retrieval The scope of the conference encompassed the theory and practice of all aspects of information retrieval in text audio image video and multimedia data AIRS 2010 continued the conference series that grew from the Information Retrieval with Asian Languages IRAL workshop series started in 1996 It has become a mature venue for information retrieval work nding support from the ACM Special Interest Group on Information Retrieval SIGIR the Association for Computational Linguistics and Chinese Language Processing ACLCLP ROCLING and the Information Processing Society of Japan Special Interest Group on Information Fundamentals and Access Technologies IPSJSIG IFAT This year saw a sharp rise in the number of submissions over the previous year A total of 120 papers were submitted representing work by academics and practitioners not only from Asia but also from Australia Europe North America etc The high quality of the work made it difficult for the dedicated program committee to decide which papers to feature at the conference Through a double blind reviewing process 26 submissions 21% were accepted as full oral papers and 31 25% were accepted as short posters The success of this conference was only possible with the support of all of the authors who submitted papers for review the program committee members who constructively assessed the submissions and the registered conference delegates We thank them for their support of this conference and for their long term support of this Asian centric venue for IR research and development *Artificial Intelligence Research and Development* B. López, J. Meléndez, P. Radeva, 2005-09-27 Artificial Intelligence AI has started the evolution in computer science It is in good health as many companies qualify their novelties as smart or intelligent The term society of knowledge draws society nearer to the future and is a symbol of breakthrough From this perspective AI has reached maturity and has exploded into an endless set of sub areas getting in touch with all other

disciplines such as situation assessment analysis and interpretation of music management of environmental and biological systems planning trains routing of communication networks assisting medical diagnosis or powering auctions The wide variety of Artificial Intelligence application areas has meant that AI researchers often become scattered in different micro specialized fields There are few occasions where the AI research community joins together while computer scientists and engineers can find a lot of interesting ideas from the cross fertilization of results coming from all of these application areas This book provides a representative selection of papers promoting synergies in the research community and includes papers on Neural Networks Computer Vision Applications Machine Learning Reasoning Planning and Robotics and Multi Agent Systems All of the papers collected in this volume would be of interest to any computer scientist or engineer interested in AI

Methods Ana Cavalcanti,Dennis Dams,2009-11-04 th FM 2009 the 16 International Symposium on Formal Methods marked the 10th anniversary of the First World Congress on Formal Methods that was held in 1999 in Toulouse France We wished to celebrate this by advertising and organizing FM 2009 as the Second World Congress in the FM series aiming to once again bring together the formal methods communities from all over the world The statistics displayed in the table on the next page include the number of countries represented by the Programme Committee members as well as of the authors of submitted and accepted papers Novel this year was a special track on tools and industrial applications Submissions of papers on these topics were especially encouraged but not given any special treatment It was just as hard to get a special track paper accepted as any other paper What we did promote however was a discussion of how originality contribution and soundness should be judged for these papers The following questions were used by our Programme Committee **Formal Description**

Techniques, IV K.R. Parker,G.A. Rose,2013-10-22 Formality is becoming accepted as essential in the development of complex systems such as multi layer communications protocols and distributed systems Formality is mandatory for mathematical verification a procedure being imposed on safety critical system development Standard documents are also becoming increasingly formalised in order to capture notions precisely and unambiguously This FORTE 91 proceedings volume has focussed on the standardised languages SDL Estelle and LOTOS while as with earlier conferences remaining open to other notations and techniques thus encouraging the continuous evolution of formal techniques This useful volume contains 29 submitted papers three invited papers four industry reports and four tool reports organised to correspond with the conference sessions **Computer and Information Science 2021—Summer** Roger Lee,2021-06-23 This edited book presents scientific results of the 20th IEEE ACIS International Summer Semi Virtual Conference on Computer and

Information Science ICIS 2021 held on June 23-25, 2021 in Shanghai, China. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users, and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications, and tools of computer and information science, and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the conference. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 13 of the conference's most promising papers are then published in this Springer SCI book, and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science.

Transactions on Rough Sets IV James F. Peters, 2005-11-15. Volume IV of the Transactions on Rough Sets (TRS) introduces a number of new advances in the theory and application of rough sets. Rough sets and proximation spaces were introduced more than 30 years ago by Zdzisław Pawlak. These advances have profound implications in a number of research areas such as the foundations of rough sets, approximate reasoning, artificial intelligence, bioinformatics, computational intelligence, cognitive science, intelligent systems, data mining, machine intelligence, and security. In addition, it is evident from the papers included in this volume that the foundations and applications of rough sets is a very active research area worldwide. A total of 16 researchers from 7 countries are represented in this volume, namely Canada, India, Norway, Sweden, Poland, Russia, and the United States of America. Evidence of the vigor, breadth, and depth of research in the theory and applications of rough sets can be found in the 10 articles in this volume. Prof. Pawlak has contributed a treatise on the philosophical underpinnings of rough sets. In this treatise, observations are made about the Cantor notion of a set, antinomies arising from Cantor sets, the problem of vagueness, especially vague, imprecise concepts, fuzzy sets, rough sets, fuzzy vs. rough sets, as well as logic and rough sets. Among the many vistas and research directions suggested by Prof. Pawlak, one of the most fruitful concerns the model for a rough membership function, which was incarnated in many different forms since its introduction by Pawlak and Skowron in 1994. Recall here that Prof.

Maintenance Decision Making Liliane Pintelon, Frank Van Puyvelde, 2006. Over the last decades, maintenance management has evolved from a somewhat neglected function into a full-fledged business function in the industry as well as in the service sector. This book provides a structured approach to maintenance management. It covers maintenance strategy, decisions, resource management, assessment, system design, etc. Decision support models and tools in these areas are discussed from the theoretical point of view and illustrated by numerous examples and case studies. Due to its concept, the book can be interesting for students as well as practitioners. This book is the successor of *Maintenance Management* 2000, which gave an introduction in the field.
