**Locative Alternation** Seizi Iwata, 2008 The aim of the present volume is two fold to give a coherent account of the locative alternation in English and to develop a constructional theory that overcomes a number of problems in earlier constructional accounts The lexical constructional account proposed here is characterized by two main features On the one hand it emphasizes the need for a detailed examination of verb meanings On the other it introduces lower level constructions such as verb class specific constructions and verb specific constructions and makes full use of these lower level constructions in accounting for alternation phenomena Rather than being a completely new version of construction grammar the proposed lexical constructional account is an automatic consequence of the basic tenet of constructional approaches as being usage based Computer Graphics World Buyers Guide ,1993 InfoWorld ,1985-12-02 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *Proceedings* ,1988 **InfoWorld** ,1986-09-08 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Directory of Portable Databases ,1991 **Commerce Business Daily** ,1998-11 *New York Magazine* ,1991-05-06 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Engineer's Complete Guide to PC-based Workstations** Gary A.
