

# Volume of Square Based Pyramid

The volume of a square based pyramid can be found by using the formula

$$\text{Volume} = \frac{1}{3} \times \text{area of base} \times \text{height} \quad \text{or} \quad V = \frac{1}{3}bh$$

The height should always be perpendicular (  $90^\circ$  ) to the base.

**Example** Find the volume of a square based pyramid with height 6cm and base side length 4cm:

$$\text{Volume} = \frac{1}{3} \times 4 \times 4 \times 6 = \frac{1}{3} \times 96 = 32\text{cm}^3$$

The base side length is 4cm, so the area of the base is  $4 \times 4$ , because the base is a square

*Epitaxy of Nanostructures* Vitaly Shchukin, Nikolai N. Ledentsov, Dieter Bimberg, 2013-03-09 The general trend in modern solid state physics and technology is to make things smaller The size of key elements in modern devices approaches the nanometer scale for both vertical and lateral dimensions Ultrathin layers or quantum wells had already gained broad acceptance for applications in micro and

optoelectronics by the 1980s. However, the development of heterostructures with lower dimensionality quantum wires where carriers are confined in two directions and move freely in one and quantum dots where carriers are confined in all three directions took longer. It became clear that quantum wire and dot structures constitute the utmost technological challenge whilst providing enormous advantages. At the beginning of the 1990s a few outstanding discoveries concerning self-organization phenomena at crystal surfaces for direct fabrication of nanostructures led to a change in the major paradigms of semiconductor physics and technology. This new approach in epitaxy enables fast parallel fabrication of large densities of quantum dots or wires for almost unlimited material combinations and has become the basis for a powerful new branch of nanotechnology. Quantum dots coherent inclusions in a semiconductor matrix with zero dimensional electronic properties persistent up to room temperature have demonstrated fascinating physical properties and given birth to a novel generation of optoelectronic devices and systems.
