

VOLVO PENTA INBOARD DIESEL

D3-170,200,220

125-147-162 kW (170-200-220 hp) crankshaft power acc. to ISO 8665

The new D3

Volvo Penta's new D3 has been developed using the latest available engine technology. It only has the name and number of cylinders in common with the first generation D3.

- Common rail system with piezo-electric injectors
- Equipped with Volvo Penta EVC-E for electronic shift & throttle
- Lightweight and compact
- Quiet and comfortable

World-class performance

The 1800 bar common rail fuel injection system with piezo-electric injectors performing multiple injections per cycle gives an extraordinary performance. In combination with a Variable Geometry Turbo-charger (VGT) this ensures outstanding acceleration, with no sign of smoke.

Robust, compact and lightweight

With cast-in grey iron cylinder liners, integrated freshwater pump, and a neatly designed marinization based on Volvo Penta's unique experience, the new D3 is a very robust engine. It is ultra-compact for its swept volume and fully symmetrical, making the package very easy to install.

Aluminum cylinder block and head gives the engine an extremely low weight for its power output.

The D3 is equipped with an engine cover that in addition to protecting the engine also gives it a modern and exclusive appearance.

Comfort

The D3 is equipped with the same type of successful engine mounts that were introduced for the D4/D6 engines. The multiple injection system in combination with the new type of engine mounts makes the engine amazingly quiet and comfortable at low speeds.

EVC-E

The next generation of the proven

Electronic Vessel Control offers further enhancements to the driver experience. The robust E-key with touch less technology is standard.

Ergonomically designed controls engage smoothly and allow for maneuvering with fingertip precision. Pushbuttons integrated on the control give easy access to optional functions such as Single Lever Control. Complete the helm with your choice of easy to read gauges and displays, including the 7" color display. Add the trip computer function for accurate fuel management and minimized environmental impact. Engine synchronization is standard in twin installations.

A propulsion package fully matched, tested and supported by one company

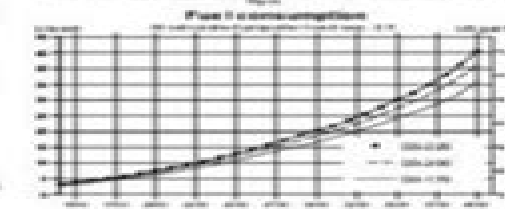

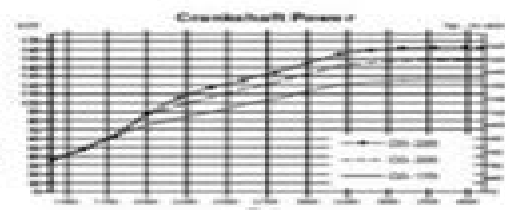

Volvo Penta's hydraulically shifted reverse gear has been specially developed with a view to increasing the standard of comfort on board.

The combination of 8" down angle, large drop center and small dimensions provides for optimized installations. V-drives are also available.

In order to get full benefit of the EVC system the reverse gear is equipped with electric shifting valve.

Meeting new emission standards

The engine has outstandingly low emissions. It complies with the requirements of the world's most stringent emission regulation, US EPA Tier 3, that will be in force year 2012.
