2004 Wall Street Journal Std Wall Street Journal Staff,2003 Chinese Student Migration and Selective Citizenship Lisong Liu,2015-08-20 Since China began its open door and reform policies in 1978 more than three million Chinese students have migrated to study abroad and the United States has been their top destination The recent surge of students following this pattern along with the rising tide of Chinese middle and upper classes emigration out of China have aroused wide public and scholarly attention in both China and the US This book examines the four waves of Chinese student migration to the US since the late 1970s showing how they were shaped by the profound changes in both nations and by US China relations It discusses how student migrants with high socioeconomic status transformed Chinese American communities and challenged American immigration laws and race relations The book suggests that the rise of China has not negated the deeply rooted American dream that has been constantly reinvented in contemporary China It also addresses the theme of selective citizenship a way in which migrants seek to claim their autonomy proposing that this notion captures the selective nature on both ends of the negotiations between nation states and migrants It cautions against a universal or idealized dual citizenship model which has often been celebrated as a reflection of eroding national boundaries under globalization This book draws on a wide variety of sources in Chinese and English as well as extensive fieldwork in both China and the US and its historical perspective sheds new light on contemporary Chinese student migration and post 1965 Chinese American community Bridging the gap between Asian and Asian American studies the book also integrates the studies of migration education and international relations Therefore it will be of interest to students of these fields as well as Chinese history and Asian American history more generally Strategic Management John A. Parnell,2013-01-15 The book is designed to be the primary reader in the capstone strategic management course It can be used in undergraduate or graduate courses although the style fits the undergraduate market best Its distinctive features include Positioned between theory and practice Text concepts are aligned with 25 case analysis steps no separate section on how to analyze a case Very readable appropriate for undergraduate or graduate courses although other readings cases simulations etc are typically required at the graduate level Global orientation Real time cases Numerous current examples largely drawn from the Wall Street Journal and Financial Times 3e has already been updated considerably Options for changes in an upcoming edition include cases real time and or traditional providing ongoing updates or commentaries to adopters and current issue debate boxes in the chapters
