Just Wondering, Jesus

Tom Ehrich,2005-03 What are the questions that are really on the minds of Christians as they try to live out their faith Author Tom Ehrich challenged readers of his weekly newspaper column and his daily e mail meditations to pose the questions that they would like to ask Jesus from the roadside as blind Bartimaeus did in the gospel He received hundreds of responses not one of them about matters of liturgy church politics or canon law Instead the

questions these ordinary Christians longed to ask Jesus were deeper and more basic Will I see my late husband in heaven How can I make my marriage more joyful Will we ever find peace What do you want of me In Just Wondering Jesus Ehrich takes 100 of these questions and answers each in the form of a brief meditation essay and provides a fascinating glimpse of what is truly on people s minds and in their hearts The meditations based on gospel readings are valuable for personal devotion and small group study **Mediation** Alain Lempereur,Jacques Salzer,Aurelien Colson,Michele Pekar,Eugene B. Singh, Anand S. Rao, 2007-04-29 The leading edge of computer science research is notoriously fickle New trends come and go with alarming and unfailing regularity In such a rapidly changing field the fact that research interest in a subject lasts more than a year is worthy of note The fact that after five years interest not only remains but actually continues to grow is highly unusual As 1998 marked the fifth birthday of the International Workshop on Agent Theories Architectures and Languages ATAL it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth and reflect on how the field has developed and matured The first ATAL workshop was co located with the Eleventh European Conference on Artificial Intelligence ECAI 94 which was held in Amsterdam The fact that we chose an AI conference to co locate with is telling at that time we expected most researchers with an interest in agents to come from the AI community The workshop which was planned over the summer of 1993 attracted 32 submissions and was attended by 55 people ATAL was the largest workshop at ECAI 94 and the clear enthusiasm on behalf of the community made the decision to hold another ATAL workshop simple The ATAL 94 proceedings were formally published in January 1995 under the title Intelligent Agents and included an extensive review article a glossary a list of key agent systems and unusually for the proceedings of an academic workshop a full subject index The high scientific and production values embodied by the ATAL 94 proceedings appear to have been recognized by the community and resulted in ATAL proceedings being the most successful sequence of books published in Springer Verlag's Lecture Notes in Artificial Intelligence series Graphic Sports Joe Aggrey, 2000-02-11 **NDF Journal** , 1997
