indispensable for successful public policy making regarding global climate change social scientists face trade offs between the scientific credibility policy relevance and legitimacy of their policy advice From a philosophical perspective this book systematically addresses these trade offs and other crucial challenges facing the integrated economic assessments of the Intergovernmental Panel on Climate Change IPCC Based on John Dewey s pragmatist philosophy and an analysis of the value laden nature and reliability of climate change economics the book develops a refined science policy model and specific guidelines for these assessments of climate policy options The core idea is to scientifically explore the various practical implications of alternative climate policy pathways in an interdisciplinary manner together with diverse stakeholders This could facilitate an iterative deliberative public learning process concerning disputed policy issues This volume makes novel contributions to three strands of the literature 1 the philosophy of social science in policy 2 the philosophy of economics and 3 debates about the design of scientific assessments including the continuous IPCC reform debate This work is thus interesting for philosophers and other scholars reflecting on the science policy interface but also for assessment practitioners climate policy makers and economists The science policy approach developed in this volume has already influenced the recent socio economic IPCC assessment Differential Undercounts in the U.S. Census William P. O'Hare,2019-02-13 This open access book describes the differences in US census coverage also referred to as differential undercount by showing which groups have the highest net undercounts and which groups have the greatest undercount differentials and discusses why such undercounts occur In addition to focusing on measuring census coverage for several demographic characteristics including age gender race Hispanic origin status and tenure it also considers several of the main hard to count populations such as immigrants the homeless the LGBT community children in foster care and the disabled However given the dearth of accurate undercount data for these groups they are covered less comprehensively than those demographic groups for which there is reliable undercount data from the Census Bureau This book is of interest to demographers statisticians survey methodologists and all those interested in census coverage **Social Science Abstracts** ,1931 **CTET Paper 2 Social Studies/ Science 12 Solved + 15 Practice Sets (Class 6 - 8 Teachers) 6th Edition** Disha Experts,2020-06-20 *China: the New Imperialists & Neo- Colonialists in Africa?* Kwame A. Insaadoo,2016-04-21 Chinese generally look condescendingly on the humanity of black Africans but over the past decades there have been a huge influx of Chinese on the African continent What is driving the Chinese to the African continent Are the Chinese in Africa to help Africa develop in their so called win win or south southdevelopment method Or are the Chinese in Africa to exploit the huge super abundant raw materials and mineral resources to fuel their expanding industries It is true that the Chinese are currently building monumental stadiums presidential palaces conference halls but as much as Africans are grateful for these they do not represent economic progress for Africa What we see though is Chinese offering huge loans to African nations in return for their raw materials Ironically most of the loans end up in the hands of Chinese contractors undertaking the construction

projects Chinese labor working in the projects and Chinese materials and products used in the projects In the end African governments are left holding the bag of huge repayments back to China Moreover some if not many of the infrastructure are often shoddy as the case of Angolan hospital and many roads in Africa have demonstrated Additionally Chinese also support African dictators like Mugabe of Zimbabwe Omar Bashir of Sudan Santos of Angola and many others with deadly weaponry to oppress African citizens Finally the Beijing Consensus though has helped lift many Chinese out of poverty cannot be replicated in Africa because of its authoritarian nature
