The Craft of Social Anthropology A.L. Epstein, 2017-07-05 In social anthropology as in other branches of science there is a close relationship between research methods and theoretical problems Advancing theory and shifts in orientation go hand in hand with the development of techniques and mutually influence one another If the development of modern social anthropology owes much to its established tradition of fieldwork it is also clear that the procedures that anthropological fieldwork should follow in the laboratory can never be prescribed in absolute terms nor become wholly standardized Yet as anthropological analysis is refined it becomes increasingly important that students in the field be aware of the need to collect basic kinds of data and know how to set about doing so In this volume anthropologists who have worked closely together for many years at the Rhodes Livingstone Institute for Social Research Lusaka and or in the Department of Social Anthropology University of Manchester discuss within a common framework modern fieldwork methods as tools for examining a number of problems of current anthropological interest Elizabeth Colson J Clyde Mitchell and J A Barnes stress aspects of the role of quantification in social anthropology and indicate a range of problems that can be illuminated by the use of quantitative techniques Equal importance is attached by all contributors to the collection and analysis of detailed case material a topic explored in J van Velsen's essay A L and T S Epstein V W Turner and M G Marwick consider the kinds of data relevant to anthropological discussion in the fields of economics law ritual and witchcraft and the methods by which such material may be collected The volume is introduced by Max Gluckman former director of the Rhodes Livingstone Institute and former head of the department of social anthropology and sociology University of Manchester

understand what has taken place since that historic date and where we are at the moment Bringing together authors with different historical cultural regional and theoretical backgrounds this volume engages in debates that address new questions arising from recent developments such as whether there is a need to reject or uphold the notion of post socialism as both a necessary and valid concept ignoring changes and differences across both time and space The authors firsthand ethnographies from their own countries belie such a simplistic notion revealing as they do the cultural social and historical diversity of countries of Central and Southeastern Europe

Anthropology and Anthropologists Adam Kuper, 2014-04-08 On its first publication in 1973 Adam Kuper s entertaining history of half a century of British social anthropology provoked strong reactions But his often irreverent account soon established itself as one of the introductions to anthropology Since the second revised edition was published in 1983 important developments have occurred within British and European anthropology This third enlarged and updated edition responds to these fresh currents Adam

Kuper takes the story up to the present day and a new final chapter traces the emergence of a modern European social anthropology in contrast with developments in American cultural anthropology over the last two decades Anthropology and Anthropologists provides a critical historical account of modern British social anthropology it describes the careers of the major theorists their ideas and their contributions in the context of the intellectual and institutional environments in which they worked

Anthropological Theory Robert Alan Manners, David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote

numerous articles and reviews for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica **The Middle East** Sami G.

Hajjar,1985-01-01 **Current Policies and Practices in European Social Anthropology Education** Dorle Dracklé,Iain R. Edgar,2004 As Europe becomes more integrated at the economic and political level attempts are being made to harmonize education policies as well This volume offers an important contribution in that the authors examine for the first time the politics and practices of social anthropology education across Europe They look at a wide variety of current developments including new teaching initiatives the use of participatory teaching materials film and video fieldwork studies applied anthropology student perspectives the educational role of museums distance learning and the use of new technologies

The Anthropology of North-East India Tanka Bahadur Subba,G. C. Ghosh,2003 This book has been written to cater to the needs of undergraduate and postgraduate students of Anthropology and Sociology It takes stock of the work done in the Anthropology of North East India and deals in four sections with various aspects of this question Section I focuses on prehistoric Anthropology section II looks at the colonial context and its effect on policy and perceptions about the North East Section III on Biological Anthropology and section IV on Social Anthropology **Shared Traditions** Charles W. Joyner,1999 Grounded in Charles Joyner s unique blend of rigorous scholarship and genuine curiosity these thoughtful and incisive essays by the eminent southern historian and folklorist explore the South s extraordinary amalgam of cultural traditions By examining the mutual influence of history and folk culture Shared Traditions reveals the essence of southern culture in the complex and dynamic interactions of descendants of Europeans Africans and Native Americans The book covers a broad spectrum of southern folk groups folklore expressions and major themes of southern history including antebellum society slavery the coming of the Civil War economic modernization in the Appalachians and the Sea Islands immigration the civil rights movement and the effects of cultural tourism Joyner addresses the convergence of African and European elements in the Old South and explores how specific environmental and demographic features shaped the acculturation process He discusses divergent practices in worship services funeral and burial services and other religious ceremonies He examines links between speech patterns and cultural patterns the influence of Irish folk culture in the American South and the southern Jewish experience He also investigates points of intersection between history and legend and relations between the new social history and folklore Ranging from rites of power and resistance on the slave plantation to the creolization of language to the musical brew of blues country jazz and rock Shared Traditions reveals the distinctive culture born of a sharing by black and white southerners of their deep rooted and diverse traditions *The New Testament in Cross-Cultural Perspective* Richard L. Rohrbaugh,2006-10-15 The Bible is not a Western book and the world of the New Testament is not

our world The New Testament world was preindustrial Mediterranean and populated mostly by nonliterate peasants who depended on hearing these writings read aloud Only a few of the literate elite were part of the Jesus movement and they knew nothing of either modernity or the Western culture we inhabit today This means that for all North Americans reading the New Testament is always an exercise in cross cultural communication Travelers diplomats and exchange students take great pains to bridge the cultural gaps that cloud mutual understanding But North American readers habitually suspend cross cultural awareness when encountering the Bible The result is that we unwittingly project our own cultural understandings onto the pages of the New Testament Rohrbaugh argues that to whatever degree we can bridge cultural gaps between ourselves and New Testament writers we learn to value their intentions rather than the meanings we create from their words Rohrbaugh s insightful interpretations of Gospel passages go a long way toward helping to span distances between the New Testament world and the present
