In Part I, readers are provided with an overview of the embryologic development of aerodigestive structures that relate to swallowing, an introduction to neural organization related to swallowing function, and physiologic aspects of swallowing, a synopsis of oral motor development, a discussion of the various etiologic categories of feeding and swallowing disorders, and an overview of genetic disorders associated with feeding and swallowing issues. Part II covers the clinical and instrumental assessment of patients, including the interdisciplinary feeding team infrastructure and function, the roles of individual members of the feeding team, the specific diagnostic tests commonly used in the assessment of feeding and swallowing issues, the classification of neonatal intensive care units, and the assessment and management of feeding and swallowing issues encountered in the neonatal intensive care unit.
