Battaglia,T.F. George,2013-04-17 Along with its inherent interdisciplinary character chemical physics is also a recognised science on its own Its foundations consist of understanding chemical phenomena in terms of the most fundamental laws of physics This book focuses on the concepts on which this science is founded rather than on the applications The subject is presented starting from the main ideas of physics classical quantum and statistical relevant to the description of phenomena of interest from the chemical point of view The authors have taken an individual approach in their presentation of the essence of a connected theory rather than mere explanations of apparently unrelated facts Audience The book will be useful to advanced undergraduate and graduate students in fields such as chemistry physics materials science engineering and biology where there is a need for a knowledge of chemistry which includes beside the presentation of facts their explanation in terms of general principles *Research in Chemistry Education* Liliana Mammino,Jan Apotheker,2021-05-17 This volume emphasizes the role of chemical education for development and in particular for sustainable development in Africa by sharing experiences among specialists across the African continent and with specialists from other continents It considers all areas and levels of chemistry education gives specific attention to known major challenges and encourages explorations of novel approaches The chapters in this book describe new teaching approaches approach explorations and in class activities analyse educational challenges and possible ways of addressing them and explore cross discipline possibilities and their potential benefits for chemistry education This makes the volume an up to date compendium for chemistry educators and educational researchers worldwide **Digital Learning and Teaching in Chemistry** Yehudit Dori,Courtney Ngai,Gabriela Szteinberg,2023-07-12 Education is always evolving and most recently has shifted to increased online or remote learning

Digital Learning and Teaching in Chemistry compiles the established and emerging trends in this field specifically within the context of learning and teaching in chemistry. This book shares insights about five major themes: best practices for teaching and learning digitally, digital learning platforms, virtual visualisation and laboratory to promote learning in science, digital assessment and building communities of learners and educators. The authors are chemistry instructors and researchers from nine countries contributing an international perspective on digital learning and teaching in chemistry. While the chapters in this book span a wide variety of topics, as a whole they focus on using technology and digital platforms as a method for supporting inclusive and meaningful learning. The best practices and recommendations shared by the authors are highly relevant for modern chemistry education as teaching and learning through digital methods is likely to persist. Furthermore, teaching chemistry digitally has the potential to bring greater equity to the field of chemistry education in terms of who has access to quality learning, and this book will contribute to that goal. This book will be essential reading for those working in chemical education and teaching. Yehudit Judy Dori is internationally recognised, formerly Dean of the Faculty of Education of Science and Technology at the Technion Israel Institute of Technology and won the 2020 NARST Distinguished Contributions to Science Education through Research Award (DCRA) for her exceptional research contributions. Courtney Ngai and Gabriela Szeinberg are passionate researchers and practitioners in the education field. Courtney Ngai is the Associate Director of the Office of Undergraduate Research and Artistry at Colorado State University. Gabriela Szeinberg serves as Assistant Dean and Academic Coordinator for the College of Arts and Sciences at Washington University in St. Louis.

Representations of Nature of Science in School Science Textbooks Christine V. McDonald, Fouad Abd-El-Khalick, 2017-04-21. Bringing together international research on nature of science (NOS) representations in science textbooks, the unique analyses presented in this volume provides a global perspective on NOS from elementary to college level and discusses the practical implications in various regions across the globe. Contributing authors highlight the similarities and differences in NOS representations and provide recommendations for future science textbooks. This comprehensive analysis is a definitive reference work for the field of science education.
