G. Sampford, Carmel Connors, 2002 Encouraging Ethics and Preventing Corruption brings theory and practice together in addressing the question How are we to be ethical in public life and through public institutions It is a major contribution to public sector ethics within Australia and internationally because it provides an exhaustive analysis of reform across a decade in one jurisdiction Queensland and then proceeds to itemise a best practice integrity system or ethics regime Drawing on the extensive research of two of Australia s leading practical ethicists this text is essential reading for all students and practitioners of applied and professional ethics in the public sphere Part A of the text provides a preferred theoretical and conceptual framework which both justifies and guides the development of a public sector ethics regime Part B examines the place of the individual within a world of institutional ethics Part C outlines the Queensland governance reforms introduced since 1989 following the Fitzgerald Inquiry which exposed corruption in the police and ministry The final chapter the Epilogue gathers the insights of earlier chapters and suggests a more explicitly ethics centred approach to governance reform that may take us beyond best practice Clearly while it is the Australian context we have in mind we are confident that this is a text which addresses the quest for integrity and ethics in government wherever society is committed to social and liberal democratic ideals

Understanding Ethics Noel Preston, 2014 We encounter ethical challenges on a day to day basis in matters that involve what we call ethical values Some of these challenges affect us as individuals but seem beyond our power to influence such as a political decision about whether our nation should go to war Other momentous ethical questions confront us in particular situations such as when a road accident leaves a loved one brain damaged and medical practitioners seek our permission to turn off life support Understanding Ethics introduces the frameworks of moral philosophy to analyse contemporary moral issues and perennial human dilemmas While the early chapters of ethical theory remain substantially the same the rest of the book is expanded with updated references new case studies and an improved index The new edition examines particular issues which reflect many of the social scientific and cultural changes of the last decade especially in an Australian context Understanding Ethics is constructed in three sections Part A introduces the nature language and frameworks of ethics concluding with a chapter on ethical decision making Part B explores topical applied ethics issues of interpersonal and social

significance ranging through bioethics sexual ethics environmental ethics business ethics political ethics and questions of war and social justice Part C considers how we learn ethics and cultivate a moral life by exploring ethics education in schools and the workplace and finally contains an examination of how we sustain our ethical commitments across a lifetime while experiencing constant change Topics covered The Planet and the Environment Global warming and energy policy Population and poverty Global citizenship and the Earth Charter Animal rights Bioethics Stem cell research and cloning Euthanasia Biotechnology and developing countries Professional Life and Workplaces The media and journalism Teachers schools and values education Business ethics Politics and Policy making Social justice in Australian society Public sector ethics Conflicts of interest and codes of conduct Life Love and Sexuality Honesty and truth telling Same sex marriage Spirituality War Terrorism and Violence Capital punishment War including just war theory Terrorism and torture

Recordkeeping, Ethics and Law Livia Iacovino, 2006-07-20 Distributed networks such as the Internet have altered the fundamental way a record is created captured accessed and managed over time and therefore who controls has access to and is responsible for its authenticity Law and ethics provide the major sources of regulatory controls over participants in such networks This book analyses the interrelationship of recordkeeping ethics and law in terms of existing regulatory models and their application to the Internet environment It proposes the legal and social relationship model as an analytical tool for identifying the rights and obligations of recordkeeping participants in networked business transactions within communities of common interest based on trust The model is also used to examine the legal concepts of property access privacy and evidence with particular reference to its Internet context As legal relationships have their basis in the law of obligations found in both common and civil law systems as well as archival science the model has a broad based application The approach in this book has been to reconcile a number of archival traditions the common strands rather than the differences in particular concepts of identity trust acts actors and social relationships as fundamental concepts to social regulation It is therefore primarily directed to archives and records academics and practitioners especially those working within the realm of electronic records in order to provide them with a sound theoretical and practical knowledge of the legal and ethical dimensions of records created in distributed environments
