Technologies for Prospecting, Extraction, and Utilization of Space Resources Paul Zabel, Philipp Reiss, Angel Abbud-Madrid, Beth Lomax, Florian Kehl, Valentin T. Bickel, Hendrik Kolvenbach, Philip Arm ,Gabriela Ligeza, 2024-11-18 Sustainable exploration of the solar system requires a large amount of material and propellant to be transported out of Earth s gravity well and onwards to their destination Despite recent advances in lowering launch costs transferring material from Earth to space is still very costly It still amounts to several thousand to tens of thousands of Euros per kilogram to low earth orbit and transportation to the Moon and Mars even a multiple of that There is an abundance of resources in our solar system that can be utilized to reduce the material required to be launched from Earth significantly Among these resources are water ice hydrates metals regolith rare earth elements chemical compounds volatiles and rare isotopes Utilizing these space resources would enable e g consumable and propellant production in space manufacturing or

the construction of large structures which would otherwise be very expensive or not possible at all with material launched from Earth Lunar regolith for example contains iron and titanium that could be used to produce spacecraft components or structural elements for a lunar base while oxygen released from oxide minerals could be used for respiration or as a propellant In addition water ice could be extracted from regolith and used for consumption or agricultural applications Although there have been numerous missions to the Moon there are still a lot of unknowns concerning its surface making it difficult to know where to look for resources and how to extract them

The Prospector's Wife John Drabble, Aileen Mary Eleanor Drabble was a young woman just out of school when in 1911 she immigrated to Canada along with her family They left the comfort of upper class British society to start again in Vancouver then a booming city on the edge of the Canadian frontier Impetuous and headstrong Aileen soon fell in love with a gold prospector Together they embarked on a 40 year adventure marked by both great elation and deep adversity Whether in Vancouver or in the wilderness of BC s interior Aileen known as Mimi to her family left an indelible impression on nearly everyone she met More than 30 years after her death those who knew her still tell stories about her Though never famous she was very much a pioneer whose life in many ways paralleled the journey of her adopted country from a British colony to an independent nation

Rethinking Leadership for a Green World Andrew Taylor, 2022-03-20 First James Lovelock and recently Prince William and David Attenborough believe that we have reached a tipping point in the process of climate change Whether they are right or not it is certainly true that the impact of humankind upon the ecology of the earth has reached a point where real changes in human behaviour are required If managers are to be enablers of planetary survival then we need to develop a new approach to risk which explicitly includes ecological limits upon economic behaviour This implies a fundamental reorientation of their role in allocating resources to minimise risk and maximise reward This book brings together some of the brightest contemporary thinkers on leadership complexity and sustainability to consider the big ideas that we will need to make the changes required and to outline the major themes that can inform a new approach to constructing a green world It looks at how to ensure that local models of sustainability are able to flourish in the context of global networks and presents specific case studies of markets and organisations that offer insights into the development integrated solutions and the leadership lessons we can learn Combining both theory and practice this book serves to guide business managers and provides deeper insight and critical perspectives on some of the key issues facing leaders moving towards the green economy It also provides useful supplementary reading for students in business and environmental studies

Bio-prospecting of Novel Microbial Bioactive Compounds for Sustainable Development Kartika Sharma, 2025-04-26. This book discusses current developments and upcoming trends in the microbial synthesis of various bioactive compounds from waste product which have a very good market worldwide. The extraction of biologically active compounds from microorganisms is still essential for the creation of novel pharmaceuticals and agricultural chemicals and has underpinned their application as drugs and functional food ingredients. The demand of pharmaceuticals, nutraceuticals and agrochemicals is rising globally for the multi-billion dollar market of human disease prevention and treatment. However, the limitations and issues associated with the extraction of these bioactive compounds from natural resources such as plants, animals or fungi limit the large scale use of pharmaceuticals, nutraceuticals and agrochemicals. The microbial production of agrochemicals, nutraceuticals and pharmaceuticals by utilizing waste product is now thought to be an environmentally benign process. The major goal of this book is to draw attention to excellent original research and review articles that contain cutting edge characterization techniques and novel bioactive chemicals production that make important contributions to the field with many prospective applications. In this book, the potential for using microbial bioactive compounds which have positive health effects in their entirety is highlighted. This book is written by eminent scientists from around the world and seasoned researchers thoroughly discuss current developments and patterns in the microbial synthesis of bioactive compounds. Academicians, scientists, researchers, graduate and post graduate students who work in the highly dynamic and competitive fields of pharmaceuticals, nutraceuticals and agrochemicals discovery will find this book to be ideal.
