The Politics of Prostitution Joyce Outshoorn, 2004-01-08 The most effective way to deal with prostitution has always been hotly debated by governments and women's movements alike Feminists want it abolished or regulated as sex work governments have to safeguard public health and order This book first published in 2004 shows how women's movements in Western Europe North America and Australia have affected politics on prostitution and trafficking of women since the 1970s asking what made them successful in some countries but a failure in others It also assesses whether government institutions to advance the status of women so called women's policy agencies have played a key role in achieving policy outcomes favourable to movement demands Written by an international team of experts and based on original sources all chapters follow the same framework to ensure comparability The final chapter offers an overall comparison identifying what makes women's movements successful and women's agencies effective presenting the case for state feminism

Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved

and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike Grand Dictionnaire Universel [du XIXe Siecle] Francais: A-Z 1805-76 Pierre Larousse,1869
