Prove It Tutorials

Dr Philippe Sormani

Prove It Tutorials:

Tutorials on the Foundations of Cryptography Yehuda Lindell, 2017-04-05 This is a graduate textbook of advanced tutorials on the theory of cryptography and computational complexity. In particular, the chapters explain aspects of garbled circuits, public key cryptography, pseudorandom functions, one-way functions, homomorphic encryption, the simulation proof technique, and the complexity of differential privacy. Most chapters progress methodically through motivations, foundations, definitions, major results, issues surrounding feasibility, surveys of recent developments, and suggestions for further study. This book honors Professor Oded Goldreich, a pioneering scientist, educator, and mentor. Oded was instrumental in laying down the foundations of cryptography, and he inspired the contributing authors: Benny Applebaum, Boaz Barak, Andrej Bogdanov, Iftach Haitner, Shai Halevi, Yehuda Lindell, Alon Rosen, and Salil Vadhan, themselves leading researchers on the theory of cryptography and computational complexity. The book is appropriate for graduate tutorials and seminars and for self-study by experienced researchers assuming prior knowledge of the theory of cryptography.

Tutorial on Reed-Solomon Error Correction Coding William A. Geisel, 1990

Tutorial Therapy D. Bovill, 2012-12-06 Dr Bovill is a remarkable person and this book is an eloquent expression of remarkable achievement When some seven years ago I came to the North West from the relative psychotherapeutic luxury of London I was amazed to discover a busy whole time general psychiatrist who claimed that she and her staff were giving a comprehensive service for the treatment of psycho neurosis by psychological means I did not accept the facts but I believed in the genuineness of the person Diana Bovill After careful observation and enquiry my initial scepticism turned to admiration I do not know of any psychotherapist who before has provided such skilled therapy for so many people at once Another and in some ways greater surprise awaited me Dr Bovill has consistently dedicatedly striven to describe clearly and to evaluate scientifically her work an attempt all too rare amongst psycho therapists Entering psychiatry at a somewhat advanced age she achieved the rare and perhaps unique distinction of being awarded a Doctorate of Medicine at London University for a study in psycho therapy research approved by the doyen of British psychiatry Sir Aubrey Lewis

CAFE: An Industrial-Strength Algebraic Formal Method K. Futatsugi, A.T. Nakagawa, T. Tamai, 2000-10-06 This book contains selected papers on the language applications and environments of CafeOBJ which is a state of the art algebraic specification language The authors are speakers at a workshop held in 1998 to commemorate a large industrial academic project dedicated to CafeOBJ The project involved more than 40 people from more than 10 organisations of which 6 are industrial The workshop attracted about 30 talks and more than 70 attendees The papers in the book however are either heavily revised versions presented at the workshop to reflect recent advancements or research or completely new ones written especially for this book In this regard the book is not a usual postpublication after a workshop Also although it is a compendium of papers that are related to CafeOBJ the book is not a manual reference or tutorial of CafeOBJ Probably the best description is that it is a collection of papers that investigate how to use or to make it easy to use CafeOBJ Reflecting the diverse nature of the project and its participants most of the authors are participants to the project the papers put together offer a comprehensive picture from this methodological perspective Some papers deal with various advanced aspects of the language such as rewriting logic and behavioural logic For rewriting logic a couple of significant applications were reported In particular UML now considered de facto standard language for modelling systems is the subject of one paper For behavioural logic new methodological guidelines are presented Some papers shed new light on a more traditional paradigm in the language order sorted equational specifications One paper in particular deal with a way to associate CafeOBJ with object oriented programming The other papers deal with environments for writing and verifying specifications written in CafeOBJ Underlying those papers are two major considerations user interfaces for manipulating specifications and systematic supports for proofs All the environments explained in the papers assume and support distributed computing and de facto standard network technologies such as WWW and http are incorporated
