Ian K Jennions, 2013-09-25 Integrated Vehicle Health Management IVHM is a relatively new subject with its roots back in the space sector of the early 1990s. Although many of the papers written around that time did not refer to it as IVHM, the fundamental principles of considering an integrated end-to-end system to monitor the overall health of the asset were clearly visible. As the subject of Integrated Vehicle Health Management IVHM and its associated technologies have grown up, businesses are making the transformation from selling a product to selling a service. This can be viewed as a positive disruption as a relatively small technology breakthrough is being brought to market for a large business benefit. The sequence sense acquire transfer analyze act feeds the information processed data on the asset's health into the Operations or Management control center. Here decisions can be made on maintenance actions with knowledge of the supply chain status, MRO loading etc. provided by Maintenance and Logistics systems. Undoubtedly a much more efficient and economical modus operandi. This book brings together a collection of twenty-two SAE International Technical papers on this very theme, organized according to specific areas of interest: Engines, Airframes, Electrical Power Systems, Supporting Systems, Architecture. They were selected by Dr Ian K Jennions, Director of IVHM Center at Cranfield University in the UK. Dr Jennions was also the editor of three other books on Integrated Vehicle Health Management published by SAE International: IVHM Perspectives on an Emerging Field, IVHM Business Case, Theory and Practice, IVHM The Technology. **Handbook of X-ray Imaging** Paolo Russo, 2017-12-14.
