## **Psychology An Exploration 1st Edition:**

**Conservatism: A Cultural-Psychological Exploration** Enno Freiherr von Fircks, 2024-02-23 The present work discusses the phenomenon of conservatism from a qualitative cultural psychological perspective As such the text breaks with current mainstream research about political ideologies wanting to assess a political culture within the simple administration of a questionnaire The SpringerBrief will oppose such a perspective trying to assess how the conservative minded person will structure space and time in peculiar ways In the first part of the study participants were invited to reflect about how they preserve or conserve meaning in various activities whereas the second part of the study tried to shed light onto how something preservable or conservable comes into being and what it actually makes it preservable Here an autoethnographic study revealed that something becomes meaningfully preservable when it satisfies multiple demands of the Self as well as of the environment Readers will realize the insufficiency of the positivistic attitude analyzing conservatism from a simple quantitative perspective and researchers are shown how political ideologies or cultures can be assessed ecologically something that has not yet been undertaken This leads to an appeal for scientists to study the phenomenon of conservatism more wholistically *The Art of Status* Jelena Subotic, Professor of Political Science Jelena Subotic, 2025-10-09 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s Since then there have been national and global social movements demanding the return of looted art This shift has established not only that looting is wrong but more importantly that restitution is morally right As a result of this reframing of what it means to own art an artifact's historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status The same objects that granted states high international status now threaten to provoke status decline In *The Art of Status* Jelena Subotic examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum Subotic tells the story of these artworks how they were looted how they ended up on display in national museums and how the art restitution disputes have unfolded While these cases are different in terms of their historical context of looting and ownership claims the

movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states desire for international status and prestige An in depth and nuanced account of art restitution disputes The Art of Status illuminates the shifting political significance of art on the international stage from ownership to restitution **Current Catalog** National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 The Oxford Handbook of Media Psychology Karen E. conflict and its resolution apply to Africa To answer this question Adda Bozeman examines conflict in Africa south of the Sahara in its many social political and cultural aspects past and present The author shows how African perspectives on war and diplomacy have evolved under the influence of nonliteracy tribalism and a concept of undifferentiated time In addition she confirms that indigenous cultural traditions are resurgent everywhere making it unlikely that African political values will become more closely aligned with those of the West The two civilizations view conflict differently and have different ways of resolving it The Africans are more at ease with conflict than their Western counterparts and they do not see war and peace as the mutually exclusive phenomena that Occidental societies hold them to be The author concludes that modern Western concepts of conflict not only do not but cannot allow for African realities Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Super Deciders** Claudio Feser, Daniella Laureiro-Martinez, Karolin Frankenberger, Stefano

Kausler,2012-12-06 This book is a major revision and extension of my earlier book *Experimental Psychology and Human Aging* which appeared in 1982 The intervening years have seen a remarkable expansion of psychological research on human aging especially on topics dealing with cognition They have also seen research on cognitive aging gain increasing importance within the mainstream of basic cognitive research As my lecture notes for my course in the psychology of aging grew so did my apprehension regarding the task ahead of me in revis ing the first edition The research explosion in cognitive aging forced several major changes in content from the first to the second edition Two chapters on learning and memory in the first edition were necessarily expanded to six chapters in the present edition Similarly the single prior chapter on perception and attention became two chapters as did the single prior chapter on thinking Another change from the first edition is in the addition of some review of the effects of abnormal aging on various cognitive processes particularly in regard to memory functioning To keep the revision within reasonable length some sacrifices had to be made The multiple chapters on methodology and theory in the first edition were condensed into the present single chapter However the major topics from the first edition were retained and in fact added to by the inclusion of important topics and issues that emerged over the past eight years     Bibliographic Guide to Psychology New York Public Library. *Power of Emotions: On the Affective Constitution of Political Struggle* Andreas Ventsel,Peeter Selg,2025-07-11 The emergence of political identities and communities in social media is largely driven by affective responses to current events a tendency facilitated by the dominance of emotionally and visually oriented communication However this mode of community formation leads first to the inherent instability and transience of these groups and second to the oversimplification of complex socio political issues into binary yes no alternatives Within this framework deliberation and argumentation based problem solving become increasingly difficult as discourse is supplanted by emotional reactions that position individuals either for or against an issue Particularly significant is the role of affect and emotion in communication during times of crisis whether in the context of migration the COVID 19 pandemic or the war in Ukraine This affective role is evident in the anchoring of public discourse to personal emotions and the generation and dissemination of hashtags and tags that consolidate diverse phenomena under a unified label Such collective identity coalesces around connective action which is primarily driven either by opposition to the established order or by the reinforcement of a preexisting system s foundations Consequently the emergence of these affective publics must be analyzed within the broader context of power dynamics and evolving forms of identification in the contemporary media sphere forms rooted in shared practices of expression action and interpretation This edited volume will explore the manifestations of affective semiosis meaning making at the socio cultural and discursive levels Cultural context emotional reactions and affective semiosis play a crucial role in shaping how issues related to identity and security are articulated in both domestic and foreign policy as well as in the ways solutions to these challenges are sought By adapting the concept of affective semiosis for the analysis of discursive structures this volume offers an innovative and effective approach to identifying the triggers of emotional reactions in discourse and examining their impact on the construction of political identities fear scenarios misinformation campaigns polarization and other dynamics within networked societies The volume includes both theoretically oriented papers as well as analyses of empirical materials
