The Annual of Psychoanalysis, V. 20 Jerome A. Winer, 2013-05-13 Volume 20 of *The Annual of Psychoanalysis* ably traverses the analytic canvas with sections on Theoretical Studies Clinical Studies Applied Psychoanalysis and Psychoanalysis and Philosophy The first section begins with Arnold Modell's probing consideration of the paradoxical nature of the self provocatively discussed with John Gedo Modell focuses on the fact that the self is simultaneously public and private dependent and autonomous Alice Rosen Soreff next explores innate motivation and self-protective regulatory processes from the standpoint of recent infancy research her notion of a lifelong two-track model of self and relatedness helps establish a normative baseline that can anchor psychoanalytic theory George Mahl makes an interesting contribution to Freud studies in the form of a new chronology of Freud's works and the number of pages they contain in the Standard Edition The section ends with Robert Galatzer Levy and Mayer Gruber's quasi-experiment about disgust They test and disconfirm the hypothesis that disgust is an affective response to an abstract sense of disorder rather than a transformation of a concrete bodily experience by systematically exploring references to concepts of disgust in the Old Testament Section II on Clinical Studies opens with Henry Smith's fascinating elaboration of Freud's notion of screen memories into a theory of screening that denotes the general process by which mental content is organized He illustrates his thesis by invoking the screen language employed by a patient throughout her analysis Ernest Wolf next explores the tension between being a scientist and a healer in Freud and his followers to illuminate struggles within the psychoanalytic movement and to help account for current attitudes toward abstinence neutrality and gratification Kenneth Newman focuses on this same triptych of technical precepts He argues in the spirit of Winnicott and Kohut that analysts can only alter the hostile internal environments of their patients by becoming usable objects and cultivating an optimally responsive analytic environment A particularly rich collection of applied analytic studies forms Section III of the volume Individual chapters focus on the childhood of Vincent van Gogh W.W. Meissner the psychological healing process depicted in George Eliot's *Silas Marner* Richard Almond the self-psychological meaning of blood brotherhood in D.H. Lawrence's *Women in Love* James Cowan ecstatic mysticism in the 19th century Indian saint Sri Ramakrishna Sudhir

Kakar the disintegration of the Tyrone family in Eugene O'Neill's *Long Day's Journey into Night* Frank and Annette Lachmann and the nature and analytic significance of Freud's aesthetic response to Michelangelo's *Moses* Gary Goldsmith Finally in Section IV George Brook examines the commonsense psychological knowledge of everyday life that is the nonpsychoanalytic knowledge on which much of clinical psychoanalysis ultimately depends Taken together the four sections of Volume 20 of *The Annual* offer an exciting overview of contemporary psychoanalysis Section I highlights recent trends in psychoanalytic theorizing and the testing of psychoanalytic propositions Section II explores the relevance of new theoretical perspectives to clinical work Section III demonstrates the applicability of these new perspectives to psychobiographical and literary analysis and Section IV provocatively explores the points of connection between everyday ideas and attitudes and the tenets of psychoanalytic practice

Profiles of Personality (Second Edition) Eugene DeRobertis, 2021-06-14 *Profiles of Personality* offers a refreshingly different approach to learning personality Designed to serve as a primary or supplementary textbook for courses on personality theory *Profiles of Personality* gently guides the reader to go beyond learning about the theories of personality to encouraging critical thought about them Drawing on many years of teaching experience DeRobertis writes in an accessible engaging manner that keeps the reader engaged The second edition of this text has been expanded and updated with over 100 pages of new content Personality textbooks come in two forms each with their own style of organizing content They will either be organized in terms of historical affiliation e.g. Freud and those theories that are historically affiliated with Freud etc or they will offer a series of disparate research foci Both approaches make it difficult for students to attain a coherent synoptic grasp of the subject matter *Profiles of Personality* offers an alternative It presents personality theories on the basis of a meta narrative that guides the student through an unfolding story of personality and personal becoming The meta narrative of the text reflects the whole person emphasis that gave rise to the study of personality in the first place As Walter Mischel once noted the study of personality was intended to become the meta discipline for integrating the findings and general principles of psychology as a whole as they speak to the person as a whole In contrast to the most contemporary texts take a more restrictive approach the current text returns to the macro integrative orientation of those early 20th Century personality theorists who helped to bring about the emerging humanistic revolution in psychology The macro integrative orientation has always been guided by the deeply held belief that the personality psychologist should not conflate objectivity with the objectification of the person or the personality The aim of the approach is to be theoretically open inclusive and capable of speaking to the fullness of human existence its drama far beyond the aims of adaptation to given biosocial conditions Macro integrative investigations target the full range of human experience from highly conflicted forms of pathology to highly self-transcendent forms of personal fulfillment Beginning with the contributions of the micro integrative tradition *Profiles of Personality* moves progressively deeper into the world of macro integrative theorizing increasingly exposing the role of paradox in the differential integrative process of personality formation Highlights

of this new edition include brief discussions of gerotranscendence gender and education additions to the analysis of narrative and an expanded section on multiculturalism and the ecopsychological culture of place
