Brown, 1996-01-01 At its height British toymaking was a significant industry with famous names such as Britains and Meccano known throughout the world While in essence a specialised form of small scale engineering its products and market have always been unique reflecting the current priorities of both parents and children Yet while individual toys and marques have been catalogued extensively no previous history of toymaking as a whole exists The British Toy Business provides a

fascinating example of the development of a specific industry Many early early toys were home made From the eighteenth century with its growing recognition of children as something other than small adults date the beginnings of specialised toys usually produced by small workshops and sold by street sellers The nineteenth century with its industrial growth and middle class prosperity saw an expansion of toymaking The 1960s and 1970s were the most successful years of British toymaking with companies like Lesney making record profits Yet British toy makers failed to solve a number of fundamental problems Following an unexpected sudden downturn in sales at a time of high interest rates the major names in British toy making Lesney Airfix Mettoy and Dunbee Combex Marx all collapsed between 1979 and 1985 leaving the business to be dominated largely by importers

Fixico,2019-06-24 For too many years the academic discipline of history has

ignored American Indians or lacked the kind of open minded thinking necessary to truly understand them Most historians remain oriented toward the American experience at the expense of the Native experience As a result both the status and the quality of Native American history have suffered and remain marginalized within the discipline In this impassioned work noted historian Donald L Fixico challenges academic historians and everyone else to change this way of thinking Fixico argues that the current discipline and practice of American Indian history are insensitive to and inconsistent with Native people s traditions understandings and ways of thinking about their own history In Call for Change Fixico suggests how the discipline of history can improve by reconsidering its approach to Native peoples He offers the Medicine Way as a paradigm to see both history and the current world through a Native lens This new approach paves the way for historians to better understand Native peoples and their communities through the eyes and experiences of Indians thus reflecting an insightful indigenous historical ethos and reality The Academy ,1897 **The Saturday Review of Politics, Literature, Science and Art** ,1892 **The Athenaeum** ,1881 *Academy and Literature* Charles Edward Cutts Birch Appleton,Charles

Regulating the Business of Insurance in a Federal System Joseph F. Zimmerman, 2010-12-09 In *Regulating the Business of Insurance in a Federal System* Joseph F Zimmerman provides an up to date historical description and analysis of the regulation of the business of insurance in the United States He focuses on the controversial issue of whether Congress should authorize optional federal charters for insurance companies thereby establishing a dual charter system superficially similar to the dual banking system Reviewing the evidence between federal and state level regulation of the financial securities industry Zimmerman finds that federal regulation falls woefully short of its state counterpart He concludes that the current system rather than the proposed dual insurance regulatory system is the most efficient and effective **250 Years of**
