Competency-Based Assessments in Mental Health Practice Susan W. Gray, 2011-02-25 Competency Based Assessments in Mental Health Practice should be required reading for all clinical practitioners and students Author Susan W

Gray provides a competency based assessment model that moves away from looking at mental illness as a disease to capturing people's strengths and the uniqueness of their experience with mental illness. Alex Gitterman, Zachs Professor and Director of PhD Program, Competency Based Assessment in Mental Health Practice, not only describes the rather cumbersome DSM IV TR in a manner that graduate students and clinicians can easily understand and apply but it also presents a competency based type of clinical assessment that most effectively integrates the social work practice orientation that acknowledges, appreciates and nurtures client strengths, resilience and client ability for empowerment. Agathi Glezakos, PhD, LCSW, School of Social Work, California State University Long Beach, A competency based assessment model integrating DSM classifications for a complete strengths based diagnosis. Competency Based Assessments in Mental Health Practice introduces a unique competency based assessment that presents a brief overview of the major mental disorders that practitioners will likely encounter in their work with clients followed by a series of case studies and practical applications. This book provides valuable guidance for clinicians to make assessments grounded in client strengths and possibilities for a more therapeutically complete picture of every client's story. Organized around selected diagnostic categories from the DSM IV TR, this hands-on guide offers a multidimensional look at the many factors that play a role in a client's life. Its holistic approach to the assessment process considers each client's unique experience with mental illness through a concurrent evaluation of strengths and pathology in order to set the stage for realistic optimism about the potential for change. **U.S.**
