Urban Models And Public Private Partnership:

Urban Models and Public-Private Partnership Remo Dalla Longa, 2011-03-29 This book addresses the topic of urban models with reference to large western cities and particularly to global cities In the current transitional phase the use of language and the systematization of phenomena has become important The book s matrix examines two important and strongly connected themes urban models and public private partnerships PPP determined by urban functions which are transformed in an increasingly rapid and complex manner as a result of globalization PPPs represent the new border of the modern global state The book focuses on two principal urban models renewal and restructuring through PPPs and subsequently the relationship between state and market in fourteen Italian cities renewal and two central European cities Leipzig and Budapest restructuring CoUrbIT Complex Urban Investment Tools and the book *Globalization and Urban Implosion Creating New Competitive Advantage* by the same author serve as points of reference *Urban Models and Public-Private Partnership* Remo Dalla Longa, 2011-03-31 *Urban Infrastructure* Remo Dalla Longa, 2023-03-01 The book deals with the concept of urban infrastructure and the strong evolution of globalization in particular the driving force taken by global cities Urban infrastructure is a constituent part of the global cities both have a synergistic evolution The main reference is to western global cities in the intertwining of financialization settling and brownfield which is a little different from the urbanization of other global cities of other non developed countries or emerging countries There is therefore a significant link between globalization and urban infrastructure The occurrence of slowbalization can have consequences on urban areas infrastructures and more generally on the different dichotomy between global city and nation With the pandemic infectious and the post COVID there is already a different configuration between the global city and the rest of the national territory A driving element of the urban infrastructure and the global city has been the financialization and identification of assets within global cities Urban infrastructure as an asset has grown considerably in the last two decades in the wake of what has already been highlighted previously for real estate There are contiguous issues that affect the concept of urban infrastructures and they are the enormous growth of finance and the landings of this in the great cities of the world with investments that first involved Real Estate and then urban infrastructures There has also been a technological revolution that has merged the ubiquitous technological infrastructure with other more traditional components of the infrastructure even apparently recent themes such as smart cities come from this evolutionary trend and merge with urban infrastructures The theme of smart cities if properly interpreted gives strength to the concept of urban infrastructure **Public-Private Partnerships in Urban Bus Systems** Alejandro Hoyos Guerrero, Abel Lopez Dodero, 2021-06-25 Many cities have sought to replicate the urban bus public private partnership PPP structures that succeeded at the beginning of the millennia such as those implemented in Brazil Colombia and Mexico These cities improved their public transportation systems in the face of rapid urbanization rising air pollution and increasing road safety incidents through these PPP interventions Examining these

past international experiences and others Public Private Partnerships in Urban Bus Systems An Analytical Framework for Project Identification and Preparation first challenges the assumption that PPP structures are always the optimal approach for improving urban bus systems The authors use relevant case studies to demonstrate that structuring such PPPs in cities in the developing world requires tailor made interventions that respond to local contexts The authors identify essential elements for PPP feasibility and invite readers to consider alternative solutions for achieving the desired objectives This book presents an analytical framework that public transportation practitioners can use to support the process of identifying and preparing appropriate technical financial and legal structures to improve urban mobility if a PPP is the preferred solution It follows a detailed risk based approach to thoroughly analyze the challenges that might be experienced by cities that pursue private participation in proposed urban bus interventions Using specific examples the authors thoroughly analyze the risks and the specific potential planning stage challenges likely to be encountered and suggest strategies for practitioners to respond to the local contexts and the various alternative solutions This study builds upon international experiences predominantly in Latin America and in PPPs focused on streamlining fleet provision and operation Finally the book helps to identify and define bankable project structures that could respond well to local contexts and minimize risks

Public-Private Partnerships for Infrastructure Development Raymond E. Levitt, W. Richard Scott, Michael J. Garvin, 2019 Large infrastructure projects often face significant cost overruns and stakeholder fragmentation Public Private Partnerships PPPs allow governments to procure long term infrastructure services from private providers rather than developing financing and managing infrastructure assets themselves Aligning public and private interests and institutional logics for decades long service contracts subject to shifting economic and political contexts creates significant governance challenges We integrate multiple theoretical perspectives with empirical evidence to examine how experiences from more mature PPP jurisdictions can help improve PPP governance approaches worldwide The Urban Rehabilitation of Post-Disaster Scapes Nerma Omićević, Bojana Bojanić Obad Šćitaroci, 2023-03-14 This book provides the first extensive examination and analysis of the use of the urban landscape during the disaster process by connecting its elements throughout disaster phases the pre disaster phase consisting of reduction in form of prevention and mitigation the disaster event phase consisting of the disaster impact followed by the disaster effects and the post disaster phase consisting of the post disaster recovery This work includes the analysis of 18 disaster case studies worldwide of which 12 case studies are within the natural and 6 case studies within the man made disaster category The criteria for choosing these examples is based on the division into natural and man made disaster subcategories and the period of their occurrence from 1991 to 2021 The main purpose of this comparative analysis is to reveal the use of the urban landscape during the disaster process through the role of its open public spaces during each disaster phase in both natural and man made disaster categories The book is a useful read for researchers and students of disaster management Journal of Contemporary Urban Affairs. Marchettini,C.A. Brebbia,R. Pulselli,S. Bastianoni,2014-09-23 Containing the proceedings of the 9th International Conference on Urban Regeneration and Sustainability this book addresses the multi disciplinary aspects of urban planning a result of the increasing size of cities the amount of resources and services required and the complexity of modern society Most of earth s population now lives in cities and the process of urbanisation still continues generating many problems deriving from the drift of the population towards them These problems can be resolved by cities becoming efficient habitats saving resources in a way that improves the quality and standard of living The process however faces a number of major challenges related to reducing pollution improving main transportation and infrastructure systems New urban solutions are required to optimise the use of space and energy resources leading to improvements in the environment i e reduction in air water and soil pollution as well as efficient ways to deal with waste generation These challenges contribute to the development of social and economic imbalances and require the development of new solutions Large cities are

probably the most complex mechanisms to manage. However, despite such complexity, they represent a fertile ground for architects, engineers, city planners, social and political scientists, and other professionals able to conceive new ideas and time them according to technological advances and human requirements. The challenge of planning sustainable cities lies in considering their dynamics, the exchange of energy and matter, and the function and maintenance of ordered structures directly or indirectly supplied and maintained by natural systems. Topics covered include Urban strategies, Planning, development and management, Urban conservation and regeneration, The community and the city, Eco town planning, Landscape planning and design, Environmental management, Sustainable energy and the city, Transportation, Quality of life, Waterfront development, Case studies, Architectural issues, Cultural heritage issues, Intelligent environment and emerging technologies, Planning for risk, Disaster and emergency response, Safety and security, Waste management, Infrastructure and society, Urban metabolism.

Lonely in the Crowd: Plugged or Remote? Tobia Zevi, 2025-06-20

The Covid 19 pandemic forced cities to shut down and citizens to stay home, disrupting economic activity and social life. The crisis pushed companies to adopt remote work, transforming it from a niche practice to a widespread norm, altering the balance between work and personal life. This shift created inequalities across sectors and influenced the ability of global cities to attract talent in a globalized labor market. Now, as the pandemic has receded, many companies are reversing course. This Report explores how remote work has impacted cities and citizens, from mobility to urban planning. How can remote work reshape global cities? What strategies are available to local authorities? Is remote work still the future?
