Source: Captain John Smith, "The General History of Virginia, New England & The Summer Isles" - 1624. Smith was among the earliest leaders of Jamestown. Here, he described conditions prior to resuming his leadership after a trip to England in 1609.

Our famine was so great that a savage was killed and buried and the poorer of the men dug him up again and ate him; and they did this to others, boiling them with roots and herbs. This was the time which still to this day call the starving time. It was too vile [disgusting] to say what we had to go through. But it was our own fault for our lack of planning. Too many men did not want to work hard and there were disagreements within the government. It was not the fault of the land. We left England with enough provisions for six months, it would have been sufficient, but we lost so much of it all sea. Yet we were able to endure and lived on what this good country naturally gives us. Yet, we could have been in Paradise itself and with these leaders, our experience would not have been much better.

Grant,2014-04-04 In this book extended case studies of two veteran teachers and their students are combined with the extant research literature to explore current issues of teaching learning and testing U S history It is among the first to examine these issues together and in interaction While the two teachers share several similarities the teaching practices they construct could not be more different To explore these differences the author asks what their teaching practices look like how their instruction influences their students understandings of history and what role statewide exams play in their classroom decisions History Lessons Teaching Learning and Testing in U S High School Classrooms is a major contribution to the emerging body of empirical research in the field of social studies education chiefly

in the subject area of history which asks how U S students make sense of history and how teachers construct their classroom practices Three case study chapters are paired with three essay review chapters intended to help readers analyze the cases by looking at them in the context of the current research literature Two concluding chapters extend the cases and analyses the first looks at how and why the teachers profiled in this book construct their individual teaching practices in terms of three distinct but interacting sets of influences personal organizational and policy factors the second explores the prospects for promoting what the author defines as ambitious teaching and learning Many policymakers assume that standards based reforms support the efforts of ambitious teachers but until we better understand how they and the students in their classes think and act that assumption is hollow at best This book is a must have for faculty and students in the field of social studies education and broadly relevant across the fields of curriculum studies and educational policy Regents Exams and Answers: U.S. History and Government 2020 Eugene V. Discipline Problems Tadashi Dozono, 2024-05-07 Angel a Black tenth grader at a New York City public school self identifies as a nerd and likes to learn But she s troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas presenting a sugar coated image of the United States that is at odds with her everyday experience The history I learned in school is simpler she says The world I live in is a lot more complex Angel like every student interviewed in Discipline Problems has been identified by teachers as a troublemaker a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she s taught speak to

her curiosity and insight crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools she exposes the shortcomings of her classrooms academic environments by challenging both the content and the methods of her education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners
