**Guide to Web Application and Platform Architectures** Stefan Jablonski, Ilia Petrov, Christian Meiler, Udo Mayer, 2013-03-09 New concepts and technologies are being introduced continuously for application development in the World Wide Web. Selecting the right implementation strategies and tools when building a Web application has become a tedious task requiring in-depth knowledge and significant experience from both software developers and software managers. The mission of this book is to guide the reader through the opaque jungle of Web technologies. Based on their long industrial and academic experience, Stefan Jablonski and his coauthors provide a framework architecture for Web applications which helps choose the best strategy for a given project. The authors classify common technologies and standards like NET, CORBA, J2EE, DCOM, WSDL and many more with respect to platform architectural layer and application package and guide the reader through a three-phase development process consisting of preparation, design, and technology selection steps. The whole approach is exemplified using a real-world case: the architectural design of an order entry management system.

*Agile Database Techniques* Scott Ambler, 2012-09-17 Describes Agile Modeling Driven Design (AMDD) and Test Driven Design (TDD) approaches, database refactoring, database encapsulation strategies, and tools that support evolutionary techniques. Agile software developers often use object and relational database (RDB) technology together and as a result must overcome the impedance mismatch. The author covers techniques for mapping objects to RDBs and for implementing concurrency control, referential integrity, shared business logic, security, access control, reports, and XML. An agile foundation describes fundamental skills that all agile software developers require, particularly Agile DBAs. Includes object modeling, UML, data modeling, data normalization, class normalization, and how to deal with legacy databases. Scott W. Ambler is author of *Agile Modeling* 0471202827, a contributing editor with *Software Development* [www.sdmagazine.com](http://www.sdmagazine.com) and a featured speaker at software conferences worldwide.
