### OPERATION

Adjust the guide wire so as to lay along heads, wheel  
flaps, straight edges, etc. The driver can also be used for  
laying out with a curved pattern designed template.

Adjustment guide - The driver can apply the guide line  
to any surface, such as wheel flaps, etc.

Operate close to the material - The driver can apply the guide line  
to any surface, such as wheel flaps, etc.

You will notice that the tool results in a smooth line  
which is not broken or interrupted.

Remember the driver can be used for laying out  
the guide line on the surface being striped.

If stripes are blurred or in the wrong location due to error  
in setting guide adjustment, remove stripe at once before  
it dries, and lay out over again, remove stripe of size and  
shape over.

Larger white stripes are made by making two outside  
lines and filling in with a brush. Double or multiple stripes  
are made by adjusting the guides or straight edge. Double  
or multiple stripes are more effective and pleasing  
than a single large wide band.

Consult your paint dealer for material recommendations
