Language in Epistemic Access Caroline Kerfoot, Anne-Marie Simon-Vandenberg, 2018-07-26 This book focuses on how to address persistent linguistically structured inequalities in education primarily in relation to South African schools but also in conversation with Australian work and with resonances for other multilingual contexts around the world The book as a whole lays bare the tension between the commitment to multilingualism enshrined in the South African Constitution and language in education policy and the realities of the dominance of English and the virtual absence of indigenous African languages in current educational practices It suggests that dynamic plurilingual pedagogies can be allied with the explicit scaffolding of genre based pedagogies to help redress asymmetries in epistemic access and to re imagine policies pedagogies and practices more in tune with the realities of multilingual classrooms The contributions to this book offer complementary insights on routes to improving access to school knowledge especially for learners whose home language or language variety is different to that of teaching and learning at school All subscribe to similar ideologies which include the view that multilingualism should be seen as a resource rather than a problem in education Commentaries on these chapters highlight evidence based high impact educational responses and suggest that translanguaging and genre may well offer opportunities for students to expand their linguistic repertoires and to bridge epistemological differences between community and school This book was originally published as a special issue of Language and Education Comprehensive Healthcare Simulation:

Mobile Medical Simulation Patricia K. Carstens,Paul Paulman,Audrey Paulman,Marissa J. Stanton,Brian M. Monaghan,Douglas Dekker,2020-02-13 This book provides information to support the new and growing field of medical simulation training using mobile simulation vehicles These mobile training programs bring vehicles equipped with spaces to simulate patient care areas task trainers and mannequins directly to the medical provider This concise reference introduces programs that bring necessary training to providers and offers step by step guidance on how to establish and run a mobile medical simulation program Divided into two main sections the first analyzes the methods and techniques to implement a program including marketing finances and program evaluation The second section then delves into greater detail regarding the actual teaching and training including chapters on educational methodology scenario design and how to prepare for a simulation session Part of the groundbreaking Comprehensive Healthcare Simulation Series Mobile Medical Simulation is an ideal guide for administrators and managers who design and implement mobile simulation training programs as well as educators and trainers working in the field

Science Education for Diversity Nasser Mansour,Rupert Wegerif,2013-06-18 Reflecting the very latest theory on diversity issues in science education including new dialogic approaches this volume explores the subject from a range of perspectives and draws on studies from around the world The work discusses fundamental topics such as how we conceptualize diversity as well as examining the ways in which heterogeneous cultural constructs influence the teaching and learning of science in a range of contexts Including numerous strategies ready for adoption by interested teachers the book addresses the varied cultural factors that influence engagement with science education It seeks answers to the question of why increasing numbers of students fail to connect with science education in schools and looks at the more subtle impact that students individually constructed identities have on the teaching and learning of science Recognizing the diversity of its audience the book covers differing levels and science subjects and examines material from a range of viewpoints that include pedagogy curricula teacher education learning gender religion and ICT as well as those of in service and trainee teachers at all levels

Global Teachers, Australian Perspectives Carol Reid,Jock Collins,Michael Singh,2013-09-04 This is the first book on global teachers and the increasingly important phenomenon of brain circulation in the global teaching profession A teaching qualification is a passport to an international professional career the global teacher is found in more and more classrooms around the world today It is a two way movement This book looks at the growing importance of immigrant teachers in western countries today and at teachers who exit from western countries emigrant teachers seeking teaching experience in other countries Drawing on the international literature in Europe North America Asia and elsewhere supplemented by rich insights derived from recent Australian research the book outlines the personal institutional and structural processes nationally and internationally underlying the increasing global circulation of teachers It identifies the key drivers of global teacher mobility a range of factors including family lifestyle classroom experience travel opportunities for advancement discipline linguistic skills
