*Deconstructing Digital Capitalism and the Smart Society* Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance

technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

**Reimagining Justice, Human Rights and Leadership in Africa** Everisto Benyera, 2019-08-08 Failed attempts in Africa to develop democratised and instil virtues of a just state and society which promote benevolent leadership and advance political and economic rights and freedoms call for a new imagination By exploring a wide range of issues concerning justice human rights and leadership this book makes two major contributions to the extant literature in each of these areas Firstly as a project in decoloniality it constitutes an epistemic break from mainstream logics and approaches to understanding state society and development in Africa presenting an approach that is filtered through a Euro American lens that reifies the hegemony of a particular spatio temporality In other words it emphasises the importance of situatedness by thinking from rather than about or with Africa And secondly it addresses a fundamental shortcoming in decolonial thought which is often criticised for rejecting western paradigms of thought without providing viable alternatives The issues covered include state failure in Africa the geopolitics of US and NATO military interventions on the continent individual states responses to international law indigenous moral political

leadership authentic inclusion of marginalised voices in development practice an endogenous approach to environmental ethics and a spiritualist reflection on the need for Africa to chart her own course to political social and economic redemption By searching for alternative paths to justice human rights and leadership this book represents an effort to actualise the core vision of the African Renaissance to find African solutions for African problems **Power, Legal Education, and Law**

**School Cultures** Meera Deo, Mindie Lazarus-Black, Elizabeth Mertz, 2019-10-10 There is a myth that lingers around legal education in many democracies That myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers Based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education Embedded within law school cultures are assumptions that also stymie efforts at reform The book examines hidden pedagogical messages showing how presumptions about theory's relation to practice are refracted through the obfuscating lens of curricula The contributors also tackle questions of class and market as they affect law training Finally this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open revealing common dynamics across cultural and institutional forms The chapters speak to similar issues and to one another about the influence of context images of law and lawyers the political economy of legal education and the agency of students and faculty **Wanderer on the American Frontier** John

Maley, 2018-10-04 For nearly two hundred years a fragment of the journal of John Maley an obscure explorer on the American frontier resided at Yale University and was treated with some skepticism by historians It was only in 2012 when the first half of the manuscript turned up at a barn sale in Pennsylvania and was acquired by Southern Methodist University's DeGolyer Library that the full story of Maley's travels could be pieced together Wanderer on the American Frontier makes the complete journal available for the first time allowing readers to follow a contemporary of Lewis and Clark on his journey through the Ohio Mississippi and Red River valleys and to reassess the account's authenticity Between 1808 and 1813 Maley covered more than 16 000 miles through thirteen present day states Much of that travel took him beyond the fringes of civilization and his journal offers some of the earliest descriptions of the Ozark Plateau the Ouachita Mountains and the upper reaches of the Red River His account also provides a firsthand look at life on the frontier in the tumultuous years following the Louisiana Purchase Editor F Andrew Dowdy has carefully retraced Maley's steps and with extensive use of maps has reconciled some of the journal's more confusing passages to give readers clear modern day reference points Numerous annotations and appendices provide necessary historical context from the link between Maley's 1809 Indiana copper exploration and the Treaty of Fort Wayne to the ways his 1811 foray into Spanish Texas presaged further filibusters there during the Mexican War for Independence The fascinating tale of one of the wider ranging explorers in American

history Wanderer on the American Frontier is an invaluable resource that provides a unique window on the West in the early nineteenth century

*The Power of Anticipatory Images in Student Achievement* James M. Davy, 2020-10-03 This book features ten high academically achieving low income inner city students from Newark, New Jersey who graduated from public high schools at or near the top of their class and continued to excel in college. Using a qualitative research design, the author interviewed the ten students and the person who most influenced their educational progress about what motivated them to achieve at such high levels. Three mutually reinforcing anticipatory images emerged as a common element of their stories. In their own voices, the students describe the anticipatory images they framed, how they developed them and how they used them to their advantage. Davy advances a theoretical model of the Anticipatory Competent student who continually progresses in the directions of the images projected ahead.

*The Oxford Guide to Australian Languages* Claire Bowern, 2023-06-19 The Oxford Guide to Australian Languages is a wide ranging reference work that explores the more than 550 traditional and new Indigenous languages of Australia. Australian languages have long played an important role in diachronic and synchronic linguistics and are a vital testing ground for linguistic theory. Until now, however, there has been no comprehensive and accessible guide to their vast linguistic diversity. This volume fills that gap, bringing together leading scholars and junior researchers to provide an up to date guide to all aspects of the languages of Australia. The chapters in the book explore typology, documentation and classification, linguistic structures from phonology to pragmatics and discourse, sociolinguistics and language variation, and language in the community. The final part offers grammatical sketches of a selection of languages, sub groups and families. At a time when the number of living Australian languages is significantly reduced, even compared to twenty years ago, this volume establishes priorities for future linguistic research and contributes to

the language expansion and revitalization efforts that are underway      *Realities in Pedagogical and Phenomenological Contexts* Malte Brinkmann, Johannes Türistig, Martin Weber-Spanknebel, 2025-05-28 What is real What is evident What is true These questions of the constitution of reality in our experiences are among the key questions of phenomenology since its beginning Lately they become especially relevant under conditions of digitalisation acceleration optimisation crises and pandemics In this volume these questions are taken up in different interdisciplinary and intercultural phenomenological perspectives from a pedagogical point of view Starting from a critique of instrumental scientism and optimisation the contributions in this book ask about the theoretical empirical methodological and practical constitution of reality within experiences of learning Bildung and education as well as the subjects materialities and mediality of such experiences in different pedagogical fields and institutions The contributions show how Phenomenological Pedagogy is fruitful to explore the realities of pedagogical practices by grasping lifeworldly lived bodily and social experiences in a qualitatively meaningful empirical and experience oriented way It can thus serve as an alternative to positivistic scientific idealistic or psychologistic approaches      *Passions of the Christ* F. *The Soft Power of Non-Western Small States* Sarina Theys, 2024-09-12 This book critically engages with the concepts of small states and soft power and advances a new approach to defining small states a new conceptualisation of soft power and a method for empirically analysing the exercise of soft power It revisits the concepts of small states and soft power with a focus on Bhutan and Qatar and their approach to exercise soft power to achieve their foreign policy goals Building on two main perspectives to define small states the objective approach and the subjective perspective this book offers an intersubjective approach to define states as small The intersubjective approach requires a shared understanding between states that a certain state is small The book further highlights the importance of deconstructing the meaning of size and to separate the notion of size from the concept of power because size is not always indicative of power It argues that although small states tend to have fewer material resources than large states they nevertheless can have influence through the exercise of soft power Soft power is in this book defined as the ability of an actor to convince another actor that something is true Convincing deals with the beliefs of an actor and is a mental decision rather than a physical action This book argues that the exercise of soft power can be analysed through examining the development projection and reception of identities The findings of this book show that Bhutan was more successful than Qatar in exercising soft power and explains the reasons for this variation Aimed at a multidisciplinary audience this book will be of particular interest to practitioners scholars and students of International Relations Political Power Small States and Area Studies
