

The background of the book cover features several overlapping, translucent spheres. Each sphere is filled with a rainbow gradient, transitioning from red at the top to purple at the bottom. The spheres are arranged in a way that they appear to be floating and overlapping each other, creating a sense of depth and movement. The colors are vibrant and saturated, giving the cover a modern and artistic feel.

**Who Will Build the Ark?** Lola Seaton, Benjamin Kunkel, 2023-06-27 What ecological politics should the left propose In Who Will Build the Ark leading radical thinkers debate left alternatives to runaway global heating capitalist crisis and wider environmental breakdown clarifying the stakes in today s key disputes between Green New Deal supporters and proponents of degrowth In a series of landmark texts first published by New Left Review Herman Daly and Benjamin Kunkel discusses the possibility of

an egalitarian steady state economy while Robert Pollin warns against the worldwide slump degrowth could bring and calls instead for a single issue campaign 2 per cent of global GDP dedicated to the switch to renewable energy as the swiftest solution to the emissions crisis Nancy Fraser envisages an eco socialist exit from capitalism s multifold crises while Troy Vettese advocates eco austerity and half earth rewilding Lola Seaton draws out the strategic implications of these contested perspectives in a set of unavoidable green questions In the realm of contemporary politics Alyssa Battistoni writes on the dead end of COP diplomacy C dric Durand asks whether energy shortages will derail the transition away from fossil fuels and Thomas Meaney compares Green New Deal proposals to the pinched reality of Biden s Inflation Reduction Act The world s major powers accept the likelihood of dangerous climate change yet seem incapable of averting it Can radical green models generate the social leverage needed to do so Or as Mike Davis puts it Who will build the Ark

**Economics and Climate Emergency** Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal Globalizations

**God and the Financial Crisis** Gary D. Badcock, 2016-02-08 A fundamental belief in personal liberty and in the ability of free markets to realise the good lies at the heart of the neoliberal economic orthodoxy that has now shaped public policy for a generation Confidence in orthodox economics has however been badly shaken by the financial crisis of 2008 and in the years following by the effects of the Great Recession The era of casino banking was not only an era of de industrialisation and under employment but also of iniquitous tax avoidance schemes and of grotesquely inflated levels of social inequality Such factors we now realise have reduced the life prospects of millions of our fellow citizens This interdisciplinary volume of essays with wide ranging contributions by theologians and social scientists explores the theological economic and moral implications of these developments Its central claim is that neoliberalism s failure to appreciate the limitations of its fiduciary commitments

contributed massively to the economic crisis A more honest appraisal of the relation between the language of belief and the sphere of economic behaviour is therefore required This must also result in appropriate policy changes to harness the power of the economy to serve a more generous vision of the human good      Climate Crisis and Creation Care Christine Nellist,2021-09-28 This volume considers the interconnectedness of all creatures in relation to our planetary boundaries Through our constant consumption of resources we have had a distinctly negative impact on the world around us affecting everything from the weather food availability sea levels and the social fabric of our society This book explores how we arrived at such an unstable world and offers ecological theological and economically sustainable solutions to a global crisis      **Law and Policy for a New Economy** Melissa K. Scanlan,2017-05-26 This book makes the case for a New Environmentalism and using a systems change approach takes the reader through ideas for reorienting the economy It addresses the laws and policies needed to support the emergence of a new economy across a variety of major areas from energy to food across common pool resources and shifting investments to capitalize locally connected and mission driven businesses The authors take the approach that the challenges are much broader than setting parameters around pollution and go to the heart of the dominant global political economy It explores the values needed to transform our current economic system into a new economy supportive of ecological integrity social justice and vibrant democracy      **Collective Creativity for Responsible and Sustainable Business Practice** Fields, Ziska,2016-11-17 Over the years irresponsible business practices have resulted in industrial waste which is negatively impacting the environment As a result it is imperative to develop new solutions to reverse the damage Collective Creativity for Responsible and Sustainable Business Practice is an authoritative reference source for the latest scholarly research on the elimination of environmental degradation through new discoveries and opportunities provided by collective creativity Featuring extensive coverage across a range of relevant perspective and topics such as sustainable business model innovation social marketing and education and business co operatives this comprehensive and timely publication is an essential reference source for business leaders managers academics and community leaders seeking current research on sustainable management practices      An Introduction to Climate Change Economics and Policy Felix R. FitzRoy,Elissaios Papyrakis,2016-04-14 The 2nd edition of An Introduction to Climate Change Economics and Policy explains the key scientific economic and policy issues related to climate change in a completely up to date introduction for anyone interested and students at all levels in various related courses including environmental economics international development geography politics and international relations FitzRoy and Papyrakis highlight how economists and policymakers often misunderstand the science of climate change underestimate the growing threat to future civilization and survival and exaggerate the costs of radical measures needed to stabilize the climate In contrast they show how direct and indirect costs of fossil fuels particularly the huge health costs of local pollution actually exceed the investment needed for transition to an almost zero carbon economy in two or three decades using available technology      *Environmental*

*Economics and Ecosystem Services* Randall Bluffstone, 2025-02-07 Environmental Economics and Ecosystem Services provides a rigorous yet accessible introduction to environmental economics using ecosystem services as the underlying framework. Assuming no prior knowledge of economics and using a conversational writing style, the focus is on exploring society's linkages with the environment and how economics can help solve key environmental problems. Structured in three parts, the book first introduces readers to the key theories in environmental economics and ecosystem services and then explores the challenges of conservation. The final section examines environmental policy options such as cap and trade, behavioral nudges, community-based natural resource management, and carbon taxes. There is a strong international focus throughout the book with real-life examples taken from North America, Europe, Asia, Africa, and other regions. Students are supported by a range of pedagogical features including chapter objectives, chapter summaries, discussion questions, and further reading suggestions. In addition, the book offers worked examples, analytical problems, and Challenge Yourself boxes to develop critical thinking skills. Lecture slides and answers to questions for discussion and practice problems are available for instructors. This is the ideal text for introductory courses in environmental economics, ecological economics, economics of sustainability, environmental management, environmental policy, and ecosystem services.

*Financial Crises, Poverty and Environmental Sustainability: Challenges in the Context of the SDGs and Covid-19 Recovery* Andreas Antoniadis, Alexander S. Antonarakis, Isabell Kempf, 2022-01-03 This volume advances the state of the art in the study of the interplay among financial crises, poverty dynamics, and environmental sustainability. It offers timely and unique contributions to the immediate global challenge of sustainable development. Developing a new evidence base, the volume offers concrete recommendations for policy action needed in advancing the Sustainable Development Goals (SDGs) in relation to environment and poverty during the current conditions of financial distress. The approach taken is inductive and evidence-driven. Most analysis is based on in-depth case studies that aim to offer a detailed and dynamic picture on how poverty and environmental sustainability interact in specific social contexts and financial crises. In this way, the volume aims to generate a wealth of new and concrete evidence that offers a solid foundation to understand the multiple channels through which social and environmental factors interact and the ways in which this interaction can and should be managed in order to achieve the needed global transition to sustainability. Broader dynamics that are covered and analysed include the historical legacies of structural adjustment and colonialism, the current debt wave experienced in developing countries, the role of inequality, the significant impact that climate change has on livelihoods and on meeting the SDGs, the new challenge presented by the Covid-19 pandemic for the SDGs, the challenge of sustainable funding for SDGs, and the need for a new eco-social contract. Case studies examined include Cambodia, Ethiopia, India, Indonesia, Zambia, and subregions such as the Caribbean, sub-Saharan Africa, and Lower Mekong Countries. The volume is part of a joint initiative by the Sussex Sustainability Research Programme (SSRP) of the University of Sussex, the UNDP-UNEP Poverty Environment Action for Sustainable Development Goals, and the United

Nations Research Institute for Social Development UNRISD The overall aim is to advance a new research programme and foster a better understanding of the multiple complex and often opposing ways through which the punctuated economic slowdown of financial crises poverty dynamics and environmental sustainability interact It also makes novel recommendations into how poverty reduction and environment can work in synergy rather than being antagonistic especially during financial distress leading into recommendations directly geared towards achieving the SDGs and beyond **Factor X** Michael Angrick, Andreas Burger, Harry Lehmann, 2013-02-01 Factor X Resource Designing the Recycling Society explores the role of recycling in efforts to achieve the sustainable world envisioned in the Federal Environment Ministry's Resource Efficiency Programme known as ProgRes The chapters build a roadmap to a Recycling Society in which the decoupling of resource consumption and economic growth is accomplished **Virtual Economies** Vili Lehdonvirta, Edward Castronova, 2014-05-09 How the basic concepts of economics including markets institutions and money can be used to create and analyze economies based on virtual goods In the twenty first century digital world virtual goods are sold for real money Digital game players happily pay for avatars power ups and other game items But behind every virtual sale there is a virtual economy simple or complex In this book Vili Lehdonvirta and Edward Castronova introduce the basic concepts of economics into the game developer's and game designer's toolkits Lehdonvirta and Castronova explain how the fundamentals of economics markets institutions and money can be used to create or analyze economies based on artificially scarce virtual goods They focus on virtual economies in digital games but also touch on serious digital currencies such as Bitcoin as well as virtual economies that emerge in social media around points likes and followers The theoretical emphasis is on elementary microeconomic theory with some discussion of behavioral economics macroeconomics sociology of consumption and other social science theories relevant to economic behavior Topics include the rational choice model of economic decision making information goods versus virtual goods supply demand and market equilibrium monopoly power setting prices and externalities The book will enable developers and designers to create and maintain successful virtual economies introduce social scientists and policy makers to the power of virtual economies and provide a useful guide to economic fundamentals for students in other disciplines *Interrogating the Anthropocene* Jan Jagodzinski, 2018-05-09 This volume weaves together a variety of perspectives aimed at confronting a spectrum of ethico political global challenges arising in the Anthropocene which affect the future of life on planet earth In this book the authors offer a multi faceted approach to address the consequences of its imaginary and projective directions The chapters span the disciplines of political economy cybernetics environmentalism bio science psychoanalysis bioacoustics documentary film installation art geoperformativity and glitch aesthetics The first section attempts to flesh out new aspects of current debates Questions over the Capitalocene are explored via confluences of class and climate revisiting the eco Marxist analysis of capitalism and the financial system that thrives on debt The second section explores the imaginary narratives that raise questions regarding non human involvement

The third section addresses geoartistry the counter artistic responses to the specularization of climate disasters questioning eco documentaries and what a post anthropocentric art might look like The last section addresses the pedagogical response to the Anthropocene

**Church, Capitalism, and Democracy in Post-Ecological Societies** Cheng-tian Kuo, 2018-10-24 Most ecotheologies build their arguments on the Bible's creation story and resurrection narrative in the hope to save the ecology through spiritual meditation reforming capitalism and or deliberative democracy However based on a Chinese Christian social scientist's perspective this book argues that few of these ecotheologies are theologically and empirically valid Instead it proposes a neuro institutional post ecology theology that builds on the major themes of the Last Judgment to refocus ecotheology toward evangelism and to adapt ecotheology to capitalism and democracy in order to embrace the already but not yet impacts of the inevitable total destruction of the ecology in the near future The vanities in current ecotheologies are divided into religious economic and political categories Among the major ones discussed in this book are the vanities of ecological meditation theology leftist and rightist economic theologies as well as ecotheologies of green authoritarianism and deliberative democracy Even if these ecotheologies work perfectly as they were intended to global ecological crises have passed the point of no return i.e post ecology and rendering all of them a global vanity Based on a Chinese Christian social scientist's perspective this book proposes a moderate course of ecological spirituality economic behaviors and democratic actions but with a radical devotion to crisis management and evangelism in preparation for the Doomsdays This book is unique in its balanced interdisciplinary composition employing theories from cognitive science Christian theology economics and political science

*Frontiers of Heterodox Macroeconomics* Philip Arestis, Malcolm Sawyer, 2019-09-05 In the past few decades and intensified since the global financial crisis of August 2007 heterodox macroeconomics has developed apace and its scope has broadened in a number of directions The purpose of this volume is to review the state of the art in heterodox macroeconomics its strengths and weaknesses and future directions Heterodox macroeconomics has broadened its scope through gender macroeconomics ecological macroeconomics and further incorporated income distribution and inequality into macroeconomics analysis New macroeconomic models particularly stock flow consistent modelling has become a widely used mode of analysis Money and finance monetary policy and fiscal policy as well as other policies have been discussed widely The focus of this edited collection is on all of these issues with chapters focusing on inflation ecological sustainability and regulatory policy

**Curriculum and Learning for Climate Action**, 2021-11-01 Listen to the podcast The world is on a track to true climate catastrophe with unprecedented heat floods wildfires and storms setting new records almost weekly To avoid a climate disaster we need rapid transformative and sustained action as well as a major shift in our thinking a shift strong enough to make the climate crisis a center of our social political economic personal and educational life Curriculum and Learning for Climate Action is one of the best scorecards in comparative education for keeping track of this drama as it unfolds shedding light on the global climate crisis like no other education writing today This book turns to our curricula our

education systems and our communities for a response on how to effectively achieve Target 4.7 of the UN Sustainable Development Goals (SDGs) Universal Education for Sustainable Development (ESD) and Global Citizenship Education (GCED). The message from key stakeholders including students, educators and leaders of civil society is driven home with passion and uncommon clarity. We can and must stave off the worst of climate change by building climate action into the world's pandemic recovery.

Sustainability and the Political Economy of Welfare Max Koch, Oksana Mont, 2016-04-28. Welfare is commonly conceptualized in socio-economic terms of equity, highlighting distributive issues within growing economies. While GDP, income growth and rising material standards of living are normally not questioned as priorities in welfare theories and policy making, there is growing evidence that Western welfare standards are not generalizable to the rest of the planet if environmental concerns such as resource depletion or climate change are considered. Sustainability and the Political Economy of Welfare raises the issue of what is required to make welfare societies ecologically sustainable. Consisting of three parts, this book regards the current financial, economic and political crisis in welfare state institutions and addresses methodological, theoretical and wider conceptual issues in integrating sustainability. Furthermore, this text is concerned with the main institutional obstacles to the achievement of sustainable welfare and wellbeing and how these may feasibly be overcome. How can researchers assist policymakers in promoting synergy between economic, social and environmental policies conducive to globally sustainable welfare systems? Co-authored by a variety of cross-disciplinary contributors, a diversity of research perspectives and methods is reflected in a unique mixture of conceptual chapters, historical analysis of different societal sectors and case studies of several EU countries, China and the US. This book is well suited for those who are interested in and study welfare, ecological economics and political economy.

Dawn of the Akashic Age Ervin Laszlo, Kingsley L. Dennis, 2013-05-20. A preview of the post-mechanistic holistic world in 2020 and 2030 as well as a map of the obstacles we must overcome to get there. Reveals how the youngest generation is seeding the shift in consciousness. Explains how society will be reorganized into grassroots networks like those revealed by quantum physics and experienced through social media. With contributions from futurist John L. Petersen, ex-CEO of Sanyo, Tomoya Nonaka, media activist Duane Elgin and other visionaries. The world is changing. The transition from the mechanistic worldview to one that recognizes the interconnectedness of all life is upon us. It is the dawning of the Akashic Age. The Akashic field that connects the universe is now recognized by cutting-edge science. What we know about communication, energy and consciousness is rapidly evolving in tandem with the new quantum worldview. Many adults are consciously evolving to meet the transitional challenges at hand while today's youth have arrived already hard-wired with the new consciousness. Rising from the ashes of the old systems, this Phoenix generation of radical change agents is seeding our evolution and spiritual transformation, a process that will continue over the next few decades. Authors Ervin Laszlo and Kingsley Dennis look at the chief engine of the coming changes: the growing global understanding of nonlocality and the development of practical applications for it. They examine how the new

values and new consciousness taking hold will reorganize society from top down hierarchies into grassroots networks like those revealed through quantum physics understanding of energy and information waves and experienced daily by millions through social media With contributions from visionary thinkers such as futurist John L Petersen ex CEO of Sanyo Tomoya Nonaka media activist Duane Elgin systems scientist Alexander Laszlo and spiritual economist Charles Eisenstein this book explores the future of education spirituality the media economics food and planetary citizenship as well as the expansion of consciousness necessary to reach that future
