

Real Proptail has several components:

The Tip (1) inserts into the Mount (2).

If the Tip comes with a small cover cap, remove the cap before inserting it into the Mount.

The Tip includes a small fluid reservoir.

The Mount screws onto the Front Cap (3).

Make sure you load either the Mount or the Tip reservoir with your fluid of choice before attempting to use the Proptail. Two of these drops are usually plenty.

The Front Cap is permanently attached into the Tube (6). Do not attempt to remove it.

The Button (4) activates the Mounter, which creates the paper.

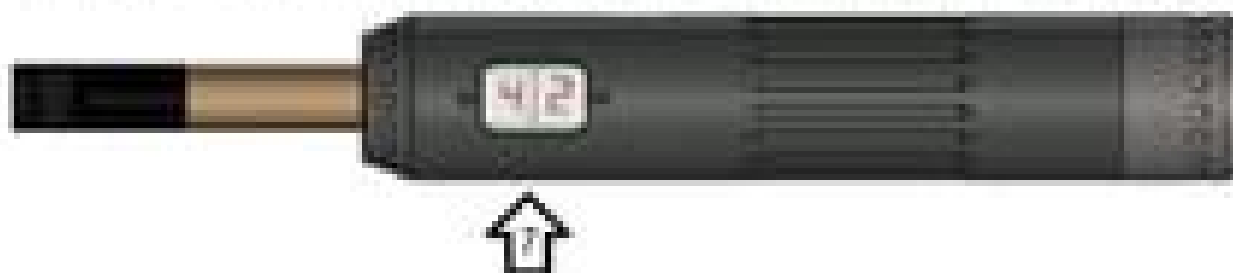

The Button is also used to change the user settings on the Proptail.

The End Cap (8) is where the battery goes.

Be careful to avoid cross-threading the End Cap into the Tube.

Refer to the Battery Instructions for more information about charging and installing a battery.

The Display Window (5) shows the voltage settings, and other modes as well as error codes in the event of a malfunction.
