Securing Australia's Future Simon Torok,Paul Holper,2017-05-29 The future will bring change for Australia But whether that change is for the better or worse largely depends on the decisions we make today as individuals and as a nation Recognising rapid changes in the global economy environment and policy the Australian Government engaged the Australian Council of Learned Academies ACOLA to undertake detailed interdisciplinary research to help guide Australian thinking and policy decisions Dozens of Australia s finest minds assessed the opportunities available to the nation globally and domestically charting a course for the future The resulting findings can prepare Australia to address the challenges ahead and make the most of the opportunities Securing

Australia's Future synthesises the major themes that emerge from ACOLA's reports. Each chapter includes key findings designed to optimise Australia's prosperity and place in the region. The future is a long game but its base must be built now. This book provides a vision for the nation for its politicians, public servants and industry leaders, a sound footing for securing Australia's future. It is a vital resource for Members of Federal and State parliaments, senior public servants, industry leaders, universities and the interested public.

Computational Biology for Stem Cell Research Pawan Raghav, Rajesh Kumar, Anjali Lathwal, Navneet Sharma, 2024-01-12. Computational Biology for Stem Cell Research is an invaluable guide for researchers as they explore HSCs and MSCs in computational biology. With the growing advancement of technology in the field of biomedical sciences, computational approaches have reduced the financial and experimental burden of the experimental process. In the shortest span, it has established itself as an integral component of any biological research activity. HSC informatics in silico techniques such as machine learning, genome network analysis, data mining, complex genome structures, docking, system biology, mathematical modeling, programming (R, Python, Perl, etc.) help to analyze, visualize, network constructions and protein-ligand or protein-protein interactions. This book is aimed at beginners with an exact correlation between the biomedical sciences and in silico computational methods for HSCs transplantation and translational research and provides insights into methods targeting HSCs properties like proliferation, self-renewal, differentiation and apoptosis.

Modeling Stem Cell Behavior Explore stem cell behavior through animal models, bridging laboratory studies to real-world clinical allogeneic HSC transplantation, HSCT scenarios. Bioinformatics Driven Translational Research Navigate a path from bench to bedside with cutting-edge bioinformatics approaches translating computational insights into tangible advancements in stem cell research and medical applications.
