Singapore Country Study Guide Volume 1 Strategic Information and Developments IBP, Inc.,2015-06 Singapore Country Study Guide Volume 1 Strategic Information and Developments Everything you need to know about the country Geography history politics economy business etc      **A Parent's Guide to Emotional Literacy (Primary School)** Emma Chong Lay Cheng,Alvin Chua Chye Huat,Ryan Chua Yong Sheng,Nur Afifah Binte Mohamed Ashefjah,Prema Mohan,Vini Mukherjee,Allen Sng Kiat Peng,Jeremy Tan Jin Hao,Stella Thng Suat Ling,2024-07-06 Developed around real world case studies and inputs from professionals in the field of teaching and psychology this guide seeks to introduce parents to emotional literacy and strategies to develop emotional resilience in their children      Infancy to IC Theophilus Huang,2025-08-04 Congratulations to us we are now parents Just like many others before us we scour the Internet and bookshops hoping to find a guide that can tell us how to be good parents Well at the very least we should avoid messing up our parental duties There is a problem we are based in Singapore While this is a great place to live and work it s quite a

different story for the kids Singapore has been consistently ranked among the top countries in the world by the OECD's Program for International Student Assessment PISA for some time. If parenting is difficult enough as it is, imagine doing it in a country with the smartest kids in the world, which is what PISA is telling us. This book describes our journey as parents in Singapore from infancy to pre-school to the Gifted Education Program to Raffles Institution to getting offers from top universities: Imperial College University College NUS College Nanyang Technological University Waseda University among others. It is my hope that this journey will provide a guideline to other parents so that they can do the same or better.

**Learning to Solve Problems** David H. Jonassen, 2010-09-13 This book provides a comprehensive up-to-date look at problem-solving research and practice over the last fifteen years. The first chapter describes differences in types of problems, individual differences among problem solvers, as well as the domain and context within which a problem is being solved. Part one describes six kinds of problems and the methods required to solve them. Part two goes beyond traditional discussions of case design and introduces six different purposes or functions of cases: the building blocks of problem-solving learning environments. It also describes methods for constructing cases to support problem-solving. Part three introduces a number of cognitive skills required for studying cases and solving problems. Finally, Part four describes several methods for assessing problem-solving. Key features include Teaching Focus. The book is not merely a review of research; it also provides specific research-based advice on how to design problem-solving learning environments. Illustrative Cases: A rich array of cases illustrates how to build problem-solving learning environments. Part two introduces six different functions of cases and also describes the parameters of a case. Chapter Integration: Key theories and concepts are addressed across chapters and links to other chapters are made explicit. The idea is to show how different kinds of problems, cases, skills, and assessments are integrated. Author expertise: A prolific researcher and writer, the author has been researching and publishing books and articles on learning to solve problems for the past fifteen years. This book is appropriate for advanced courses in instructional design and technology, science education, applied cognitive psychology, thinking and reasoning, and educational psychology. Instructional designers, especially those involved in designing problem-based learning, as well as curriculum designers who seek new ways of structuring curriculum, will find it an invaluable reference tool.
