This thirty-two chapter volume is organized into six sections: foundations, content, item development, test design, test production, and administration and post-test activities. The Handbook provides extensive treatment of such important but unrecognized topics as contracting for testing services, item banking, designing tests for small testing programs, and writing technical reports. The Handbook is based on the Standards for Educational and Psychological Testing, which serve as the foundation for sound test development practice. These chapters also suggest best test development practices and highlight methods to improve test validity and evidence. This book is appropriate for graduate courses and seminars that deal with test development and usage, professional testing services, and credentialing agencies, state and local boards of education, and academic libraries serving these groups. *Teaching Psychology* Jillian Grose-Fifer, Patricia J.
