Labyrinth and Piano Key Weirs Sébastien Erpicum, Frédéric Laugier, Jean-Louis Boillat, Michel Piroton, Bernard Reverchon, Anton J. Schleiss, 2011-05-10 Labyrinth spillways are almost as old as dam engineering In spite of the fact that they appear as a very good technical economical compromise only 0 1% of large dams are equipped with such weirs The main reason for this is that traditional labyrinth weirs usually cannot be installed on top of concrete gravity dams as they require a large foundation **Failure of Teton Dam** Teton Dam Failure Review Group (U.S.), 1977 *Labyrinth and Piano Key Weirs II* Sébastien Erpicum, Frédéric Laugier, Michael Pfister, Michel Piroton, Guy-Michel Cicero, Anton J. Schleiss, 2013-10-21 Dam engineering is currently experiencing a strong revival of labyrinth oriented weirs Labyrinth weirs with a repetitive constructional character and an increased specific discharge capacity are a very good technical economical compromise The concept of Piano Key Weir PKW with alveoli developed in overhangs from a reduced support area enables the installation of non linear crests at the top of concrete dams As a result it eliminates the main drawback of classical labyrinth weirs and enables their use to rehabilitate numerous existing dams Since the first implementation of piano key weirs by Electricité de France on Goulours dam France in 2006 at least eight PKWs have been built in France Vietnam and Switzerland Their operation over a few years has already provided the first prototype data Other projects are under study construction or planning in varied countries On another hand research programs are under progress all over the world Following a first edition in 2011 *Labyrinth and Piano Key Weirs II* PKW 2013 collects up to date contributions from people with various backgrounds from engineers and researchers to academics Summarizing the last developments on labyrinth oriented weirs the book constitutes the state of the art in research and application of piano key weir solutions and will be invaluable to professionals and scientists interested in Dams Engineering *Official Gazette of the United States Patent and Trademark Office*, 2001 Homology Effects, 2002-04-02 Homology Effects offers contributions from an international panel of researchers whose aim has been both to introduce newcomers to the field of homology effects and to bring colleagues up to date Topic coverage includes dosage compensation X inactivation imprinting paramutation homology dependent gene silencing transvection pairing sensitive silencing nuclear organization of chromosomes DNA repair quelling RIP RNAi and antisense biology homology effects in ciliates prion biology and a discourse on the evolution of gene duplications Advances in Genetics presents an eclectic mix of articles of use to all human and molecular geneticists They are written and edited by recognized leaders in the field and make this an essential series of books for anyone in the genetics field Homology the examination of similarity due to shared common ancestry encompasses a fascinating class of phenomena in mammals plants insects ciliates nematodes fungi and bacteria Homology effects concern processes that recognize homology at the level of DNA and or RNA as well as at the level of protein Their collective history begins at the turn of the century and includes some of the most puzzling and extraordinary observations in biology The volume covers phenomena that have often been

considered unusual exceptional to the rule and out of the ordinary and therefore not for general study However it is now becoming clear that taken together these phenomena represent a class of regulatory mechanisms that are widespread as well as exceptionally powerful Water for Food Security Claudia Ringler, Arif Anwar, 2016-03-22 Pakistan's water management is at a critical watershed The world's seventh most populous country faces serious challenges that will require improvements in both the hardware and software of agricultural water management Water shortages are growing rapidly as a result of growing demand across all water using sectors Rapid population growth from 175 million people in 2010 to an estimated 236 million by 2030 and 280 million by 2050 and international food price spikes create pressure to increase agricultural production of staples but demand for cash crops is also growing rapidly including for cotton fruit trees and tobacco to raise rural incomes and generate rural employment to absorb the relatively young rapidly growing rural population Water management is also increasingly affected by climate change including an increased number of flood and drought events and growing energy shortages which affect how water is being sourced and used Last but not least Pakistan's political situation is fragile which has reduced incentives to invest in enhanced agricultural water and other technologies How Pakistan addresses these challenges will be decisive for its population's future water and food security for economic growth and for environmental sustainability It will also affect water and food outcomes globally due to the interconnectedness of global food trade This book was published as a special issue of Water International

Sébastien Erpicum, Frédéric Laugier, Michel Ho Ta Khanh, Michael Pfister, 2017-04-11 Since the first implementation by Electricité de France on the Goulours dam France in 2006 the Piano Key Weir has become a more and more applied solution to increase the discharge capacity of existing spillways In parallel several new large dam projects have been built with such a flood control structure usually in combination with gates Today more than 25 Piano Key Weirs are in operation or under construction all over the world More than 15 years of research and development have enabled detailed investigations of the hydraulic and structural behaviour of the Piano Key Weir complex structure and have provided more and more accurate design equations Following the proceedings of the first two workshops held in Liege Belgium 2011 and Paris France 2013 Labyrinth and Piano Key Weirs III collects the contributions presented by people with varied background from researchers to practitioners at the 3rd International Workshop on Labyrinth and Piano Key Weirs PKW 2017 22-24 February 2017 Qui Nhon Vietnam The papers reviewed and accepted by an International Scientific Committee summarize the current state of the art on Piano Key Weirs from a theoretical to a practical point of view and present most of the main projects in operation or under construction Labyrinth and Piano Key Weirs III is thus a reference for students practitioners and researchers interested in Dams Engineering
