from URBAN DESIGN to LANDSCAPE URBANISM Sariyya ARSLAN, Erkan POLAT, 2025-04-16 Landscape Urbanism is a planning and design theory and a model of practice that argues that the best way to organize cities is through the design of the city's landscape rather than just the design of built or unbuilt areas In this context it is positioned within larger scale cultural historical and theoretical formations Landscape Urbanism is a response to the limited perception or depiction of the current project and site context by both Urban Planners and Architects and Landscape Architects It is also a concept that has been strategically introduced by these design and planning oriented professions and jobs especially in terms of Urban Design as a way to differentiate the context and is used more in a Western oriented way and has been put forward as a response to the increasingly undefined role that Landscape Architects find themselves in Landscape Urbanism describes the ability to produce urban effects that have traditionally been achieved through the construction of buildings on built up areas simply through the organization of horizontal surfaces Although first coined in the mid 1990s the term Landscape Urbanism has adopted many different uses but is most often associated with Urban Design and as a Postmodernist or even New Modernist response to the spatial scale failures of the New Urbanism the departure

from comprehensive visions and demands for Modern architecture and Urban Planning **Delta Design Futures** Chetan Kulkarni,2020-10 The Pearl River Delta region has been severely engineered throughout its process of historical emergence As it is about to confront a new wave of changes in the present century driven by economic growth industrial activity and growth of maritime operations the book proposes endurance as a way of urban design in the Pearl River Delta region to organize space around the changing frontiers between territory inhabited by people and South China Sea The book addresses the urgency to counter the risks posed to the delta city region by proposing scenarios for urban growth The design futures for the Pearl River Delta are formed by acknowledging the socio political drift towards one direction above another which influences the future organization or reorganization of space The historical emergence of the river delta highlights the fact that it is conditioned to multiple directives and multiple transformations which at the same time makes it exemplary yet idiosyncratic Therefore the scenarios of city region development presented in the book depict an integration of systems of flows and the symbiosis of conflicting powers A series of specific questions lead to principles that drive each future growth trajectory which is represented through a series of diagrammatic logics in order to organize space through structures of landscape systems and those of new territories and networks **Future Cities** Nick Dunn,Paul Cureton,2020-12-10 What might our cities look like in ten twenty or fifty years How may future cities face global challenges Imagining the city of the future has long been an inspiration for many architects artists and designers This book examines how cities of the future have been visualised what these projects sought to communicate and what the implications may be for us now It provides a visual history of the future and explores the relationships between different visualisation techniques and ideologies for cities Thinking about what futures are who they are for why they are desirable and how and when they are to be brought into being is central to this book Through visualisation we are able to experiment in ways that would be impractical and potentially hazardous in the real world and this book therefore aims to contribute toward a better understanding of the power and agency of visualisations for future cities In this lavishly illustrated text the authors apply several critical lenses to consider the subject in different ways technological futures social futures and global futures providing a comprehensive survey and analysis of visions for future cities and engaging creatively with how we perceive tomorrow s world and future studies more widely Computer-Aided Architectural Design. Future Trajectories Gülen Çağdaş,Mine Özkar,Leman Figen Gül,Ethem Gürer,2017-06-20 This book constitutes selected papers of the 17th International Conference on Computer Aided Architectural Design Futures CAAD Futures 2017 held in Istanbul Turkey in July 2017 The 22 revised full papers presented were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on modeling urban design support systems for design decisions studying design behavior in digital environments materials fabrication computation shape studies Critical Planning Futures Philip Allmendinger,Mark Tewdwr-Jones,Matthew Wargent,2025-05-27 Planning lies at the heart of successful and sustainable places yet planning scholarship often appears

stuck in routinised patterns of thought Critical Planning Futures brings together an international range of voices from diverse disciplinary backgrounds to explore new directions in planning theory interrogate planning's orthodoxy and push the boundaries of contemporary theory using ideas both from within planning and beyond Contributors draw on examples from across the globe considering the applicability of concepts and theories across traditional divides In this way Critical Planning Futures continues planning's rich tradition of borrowing ideas from elsewhere and using those ideas to shine a light back onto well rehearsed theoretical debates to set out new ways forward for planning in the twenty first century This book will be a vital resource for planning specialists though the breadth of ideas will be of interest to academics and researchers in a wide range of disciplines including urban studies geography political science and sociology

Geodesign, Urban Digital Twins, and Futures Paul Cureton, Elliot Hartley, 2025-01-23 Geodesign Urban Digital Twins and Futures explores systems processes and novel technologies for planning mapping and designing our built environment In a period of advancing urban infrastructure technological autonomy in cities and high performance geographic systems new capabilities novel techniques and streamlined procedures have emerged concurrently with climatic challenges pandemics and increasing global urbanisation Chapters cover a range of topics such as urban digital twins GeoBIM geodesign and collaborative tools immersive environments gamification and future methods This book features over 100 international projects and workflows five detailed case studies and a companion website In addition this book examines geodesign as an agent for collaboration alongside futuring methods for imagining and understanding our future world The companion website for this book can be accessed at <http://geodesigndigitaltwins.com>

African Design Futures Yaw Ofosu-Asare, 2024-10-26 This book responds to the question Is it time to reimagine design education in Africa and decolonise our creative future The proposed volume is designed to provide a source of inspiration to readers in imagining their own futures within fields of Creative industries such as performative art architecture design industrial design media production drawing and illustration filmmaking design documentary virtual reality and others With a focus on decolonising design education in Africa this book will challenge the dominant capitalist narrative and centre on the needs of African communities It will provide insights into the challenges and opportunities of decolonising design education and propose alternative models for design education that promote social and environmental sustainability cultural preservation and community empowerment Collectively the proposed book's accounts bring to life the career possibilities within a rapidly expanding global sector of creativity and innovation with immense cultural social political and economic impact By exploring new models of creative practice and education that centre on social impact cultural relevance and community empowerment this book will inspire readers to think critically about their own futures in the Creative Industries in Africa
