Nielson, 2000-02-28 In America's foreign affairs there has been a delicate balance between often conflicting imperatives of interests ideals and power How these imperatives have intersected to shape the constellation

of American foreign policy decisions throughout the nation's history and indeed how they have served to advance or subvert attainment of America's regional hemispheric and global ambitions is the subject of this study. This collection of essays explores seminal decisions in American foreign policy and diplomatic history from the early National period to the Vietnam War, each of which proved to be a turning point and then asks readers to consider alternative futures based upon different courses of action. Nielson underscores how history could and perhaps should have been different. U.S. foreign policy has in large measure been contingent upon decisions made by individuals in positions of power. Their personalities, characters, and assumptions about duty and America's role in the world have uniquely shaped policy choices and thus the course of foreign affairs for better or worse. This book hopes to show that history is ever fluid, unpredictable, and problematic. It will complement traditional texts as a what-if counterpoint which will stimulate interest in and speculation about leadership roles, national interest, and decision making in foreign policy.

Shaping and Reshaping Chinese American Identity Jingyi Song, 2010-04-12. *Shaping and Reshaping Chinese American Identity*. New York's Chinese in the Years of the Depression and World War II explores the role played by Chinese Americans in New York in the 1930s who laid the foundation for future generations to fight for civil rights as American citizens. The stories of Chinese Americans during the Depression years and World War II are underrepresented in the existing literature that has been confined to the early days of the settlement of Chinese Americans on the west coast of the United States. They were usually depicted as passive victims of exclusion as a result of Chinese Exclusion Laws. This book focuses on the active participation of the Chinese American in New York City in mainstream political, economic, and social life that helped them to forge new identity as Chinese Americans. Their active participation in federal and local elections as a means of claiming their rights as American citizens demonstrated their growing political consciousness. Chinese New Yorkers' support of both China and United States during the war reflected their dual identity as both Chinese and Americans. Their contributions to the war front and to the home front after Pearl Harbor eventually forced the reconsideration of the Chinese Exclusion Laws. The book concludes by relating the active participation of the Chinese in New York during the war years to the national movement for racial equality that resulted in new federal civil rights legislation.

*The Greenwood Encyclopedia of Daily Life in America* Randall M. Miller, 2008-12-30. The course of daily life in the United States has been a product of tradition, environment, and circumstance. How did the Civil War alter the lives of women, both white and black, left alone on southern farms? How did the Great Depression change the lives of working-class families in eastern cities? How did the discovery of gold in California transform the lives of native American, Hispanic, and white communities in western territories? Organized by time period as spelled out in the National Standards for U.S. History, these four volumes effectively analyze the diverse whole of American experience, examining the domestic economic, intellectual, material, political, recreational, and religious life of the American people between 1763 and 2005. Working under the editorial direction of general editor Randall M. Miller, professor of history at St. Joseph's University, a group of expert

volume editors carefully integrate material drawn from volumes in Greenwood's highly successful *Daily Life Through History* series with new material researched and written by themselves and other scholars. The four volumes cover the following periods: The War of Independence and Antebellum Expansion and Reform 1763-1861; The Civil War, Reconstruction and the Industrialization of America 1861-1900; The Emergence of Modern America; World War I and the Great Depression 1900-1940; and Wartime, Postwar and Contemporary America 1940-Present. Each volume includes a selection of primary documents, a timeline of important events during the period, images illustrating the text, and extensive bibliography of further information resources, both print and electronic, and a detailed subject index.

**Africans at Home and in the United States** Emeka C. Anaedozie, 2021-03-09. In *Africans at Home and in the United States: One People, One Problem, One Destiny* Emeka C. Anaedozie examines Pan-African cultural and intellectual history, focusing on sociocultural commonalities and challenges facing African people. To this end, Dr. Anaedozie argues that since oppression divided Africans, Pan-Africanism is the natural antidote to the subjugation that forcefully separated enslaved and colonized Africans.

**A History of the United States** Allen Clapp Thomas, 1897.

**Antipodean America** Paul Giles, 2013. A sweeping study that spans two continents and over three hundred years of literary history, *Antipodean America* identifies the surprising affinities between Australian and American literature.

**The African American Struggle for Secondary Schooling, 1940-1980** John L. Rury, Shirley A. Hill, 2015-04-24. This is the first comprehensive account of African American secondary education in the postwar era. Drawing on quantitative datasets as well as oral history, this compelling narrative examines how African Americans narrowed the racial gap in high school completion. The authors explore regional variations in high school attendance across the United States and how intraracial factors affected attendance within racial groups. They also examine the larger social historical context, such as the national high school revolution, the civil rights movement, campaigns to expand schooling, and urging youth to stay in school, and Black migration northward. Closing chapters focus on desegregation and the urban crisis of the 1960s and 1970s that accelerated White flight and funding problems for urban school systems. The conclusion summarizes these developments and briefly looks at the period since 1980 when secondary attainment levels stopped advancing for Blacks and Whites alike.

**Book Highlights** A comprehensive history drawing on statistical analysis, archival research, and interviews with African Americans who attended school in the 1940s and 1950s. Lessons from the past showing how parents and local communities played the most direct and dynamic role in the fight for access to education. Today's major challenges, including the growth of inner-city poverty and changing family structures. John L. Rury is professor of education and by courtesy history at the University of Kansas. Shirley A. Hill is professor of sociology at the University of Kansas. Based on prodigious research, *The African American Struggle for Secondary Schooling* sets a new standard of excellence in social history and policy studies. The authors evocatively recreate the passions of the civil rights movement and centrality of public schools in the ongoing quest for justice, opportunity, and freedom.
