Us Nuclear Weapons The Secret History:

The Royal Navy and Nuclear Weapons Richard Moore, 2001 From a post Cold War perspective the book suggests that such scepticism can teach us a great deal about military technological innovation The Royal Navy and Nuclear Weapons will appeal to students of naval history postwar defence policy and the Cold War as well as professional practitioners and the informed general reader **BOOK JACKET** **EVOLUTION OF THE US SEA-BASED NUCLEAR MISSILE DETERRENT: WARFIGHTING CAPABILITIES** GEORGE J. REFUTO, 2011-08-12

This historical research study traces and analyzes the technological development and force deployment of US submarine launched strategic nuclear ballistic missiles and the evolution of their military missions during and after the Cold War from countervalue civilian political and economic targets strategic deterrence to the wider range of strategic and theater tactical nuclear conventional military force targeting characteristic of counterforce or warfighting capabilities Scope of this study also includes US nuclear ballistic missile submarine survivability against antisubmarine warfare operations and the role of the US fleet ballistic missile force in current 21st Century regional and global military threat scenarios and beyond Exposed: The Secret History of Britain's Nuclear Experiments Susie Boniface, 2025-02-28

Uncovers the untold story of Britain's atomic bomb program revealing the devastating human cost and decades long cover up Once upon a time it was necessary to have a weapon that could unleash hell Britain hand picked its healthiest and cleverest men to undertake a truly terrifying mission to create and detonate an atomic bomb Somehow a country beset by post war rationing and isolated from her allies created the most devastating weapons known to man on the cheap and at the hurry up But it came at a horrifying price for them and their families The race to build a nuclear bomb sucked thousands into its vortex who are still dealing with the effects of radiation today veterans widows children scientists and indigenous people all subjected to fear radiation and experimentation A black cloud still hangs over those who survive and their descendants who fear the consequences of every fresh pregnancy Exposed tells the complete story of the Cold War arms race from inception to fallout and for the first time reveals the blood stained truth at the heart of the British state's longest criminal cover up Today the UK's nuclear deterrent is a theoretical shield that shelters millions worldwide protects it from aggressors and guarantees its Prime Minister a seat at the top table But for seven decades the veterans who created it have been denied truth and justice As the handful of survivors launch a last ditch legal bid for the answers Exposed reveals the full price they paid for our peace and prosperity Evolution of the USAF Strategic Nuclear Bomber Deterrent George J. Refuto, 2023-04-28

About the Book In this research study former Defense Department consultant George Refuto traces the technological evolution of USAF long range strategic nuclear bomber aircraft during and after the Cold War as well as the development of their missions and utilization of US nuclear bombers in 21st century regional and global military threat scenarios Five distinct periods are covered in this study World War I 1914 1918 the Interwar Period 1919 1939 World War II 1939 1945 the Cold War 1946 1991 and the Post Cold War Period 1991 present with

an emphasis on the latter two In his writing Refuto focuses on developing a model that encompasses bombing and air defense for each period and showing how concepts technologies and implementations of strategic bombing have changed and influenced the current level of development of the USAF strategic nuclear bomber force and doctrine and what is projected for the future About the Author George J Refuto is a former Defense Department consultant who has extensive academic and professional experience in the fields of military history weapon systems technology intelligence surveillance reconnaissance systems and US national security defense policy He has worked in both the defense and intelligence communities and holds a master s degree in International Affairs from Columbia University with specializations in US USSR strategic and theater tactical nuclear forces undersea and airborne naval weapons systems and Russian Soviet politics He has previously published *Evolution of the US Sea based Nuclear Missile Deterrent Warfighting Capabilities* and is working on a third book on the US ICBM deterrent

A Global History of the Cold War, 1945-1991 Philip Jenkins, 2021-09-25 This textbook provides a dynamic and concise overview of the Cold War Offering balanced coverage of the whole era it takes a firmly global approach showing how at various times the focus of East West rivalry shifted to new and surprising venues from Laos to Katanga from Nicaragua to Angola Throughout Jenkins emphasises intelligence technology and religion as well as highlighting themes that are relevant to the present day A rich array of popular culture examples is used to demonstrate how the crisis was understood and perceived by mainstream audiences across the world and the book includes three snapshot chapters which offer an overview of the state of play at pivotal moments in the conflict 1946 1968 and 1980 in order to illuminate the inter relationship between apparently discrete situations This is an essential introduction for students studying Cold War twentieth century or Global history

U.S. Nuclear Weapons in Canada John Clearwater, 1999-10-01 In this second volume of his nuclear weapon series John Clearwater continues to investigate the presence of American nuclear weapons in Canada In *Canadian Nuclear Weapons* Clearwater told the story of nuclear weapons that were in the hands of Canadian forces during the Cold War In *U S Nuclear Weapons in Canada* he goes further looking at nuclear weapons held by American forces on Canadian soil His purpose is to bring together until recently secret information about the nature of the nuclear weapons stored stationed or lost in Canada by the United States Air Force and the United States Navy and combines it with known information about the systems in the U S nuclear arsenal The history of the atomic bomb in Canada goes back to the first years immediately after World War II when the U S government under the prodding of the newly created Strategic Air command began a slow and steady process of talks designed to allow Goose Bay to be groomed for the eventual acceptance of nuclear weapons Crashes and nuclear accidents Conspiracies and cover ups Clearwater examines them all in great detail The reader will see for the first time the minutes of Cabinet and the Cabinet Defence Committee meetings in which the storage of nuclear weapons are discussed Also printed here for the first time are the agreements between Canada and the U S for the storage of nuclear weapons Many of the documents presented here were until recently classified as secret and

many were top secret **Defense's Nuclear Agency 1947-1997 (DTRA History Series)** Defense Threat Reduction Agency, 2003-09 This official history was originally printed in very small numbers in 2002 Defense's Nuclear Agency 1947-1997 traces the development of the Armed Forces Special Weapons Project AFSWP and its descendant government organizations from its original founding in 1947 to 1997 After the disestablishment of the Manhattan Engineering District MED in 1947 AFSWP was formed to provide military training in nuclear weapons operations Over the years its sequential descendant organizations have been the Defense Atomic Support Agency DASA from 1959 to 1971 the Defense Nuclear Agency DNA from 1971 to 1996 and the Defense Special Weapons Agency DSWA from 1996 to 1998 In 1998 DSWA the On Site Inspection Agency the Defense Technology Security Administration and selected elements of the Office of Secretary of Defense were combined to form the Defense Threat Reduction Agency DTRA **Bulletin of the Atomic Scientists**, 1995-07 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *British Nuclear Weapons and the Test Ban 1954-1973* John R. Walker, 2016-05-23 In 1962 Dean Acheson famously described Britain as having lost an Empire but not yet found a role Perhaps nowhere is this more apparent than in the realms of nuclear weapons An increasingly marginal world power successive post war British governments felt that an independent nuclear deterrent was essential if the country was to remain at the top table of world diplomacy Focusing on a key twenty year period this study explores Britain's role in efforts to bring about a nuclear test ban treaty between 1954 and 1973 Taking a broadly chronological approach it examines the nature of defence planning the scientific goals that nuclear tests were designed to secure Anglo American relationships the efficacy of British diplomacy and its contribution to arms control and disarmament A key theme of the study is to show how the UK managed to balance the conflicting pressures created by its determination to remain a credible nuclear power whilst wanting to pursue disarmament objectives and how these pressures shifted over the period in question Based on a wealth of primary sources this book opens up the largely ignored subject of the impact of arms control on the UK nuclear weapons programme Its appraisal of the relationship between the requirements and developments of the UK nuclear weapons programme against international and domestic pressures for a test ban treaty will be of interest to anyone studying post war British defence and foreign policy history of science arms control disarmament and non proliferation and international relations It also provides important background information on current events involving nuclear proliferation and disarmament *No End in Sight* Nathan E. Busch, 2014-10-17 The global threat of nuclear weapons is one of today's key policy issues Using a wide variety of sources including recently declassified information Nathan E. Busch offers detailed examinations of the nuclear programs in the United States Russia China Iraq India and Pakistan as well as the emerging programs in Iran and North Korea He also assesses the current debates in international relations over the risks associated with the proliferation of nuclear weapons in

the post Cold War world Busch explores how our understanding of nuclear proliferation centers on theoretical disagreements about how best to explain and predict the behavior of states His study bridges the gap between theory and empirical evidence by determining whether countries with nuclear weapons have adequate controls over their nuclear arsenals and fissile material stockpiles such as highly enriched uranium and plutonium Analyzing the strengths and weaknesses of various systems of nuclear weapons regulation Busch projects what types of controls proliferating states are likely to employ and assesses the threat posed by the possible theft of fissile materials by aspiring nuclear states or by terrorists No End in Sight provides the most comprehensive and up to date analysis of issues at the forefront of contemporary international affairs With the resurgence of the threat of nuclear terrorism Busch s insights and conclusions will prove critical to understanding the implications of nuclear proliferation

The Bomb and America's Missile Age Christopher Gainor,2018-10-15 How nuclear weapons helped drive the United States into the missile age The intercontinental ballistic missile ICBM designed to quickly deliver thermonuclear weapons to distant targets was the central weapons system of the Cold War ICBMs also carried the first astronauts and cosmonauts into orbit More than a generation later we are still living with the political technological and scientific effects of the space race while nuclear armed ICBMs remain on alert and in the headlines around the world In *The Bomb and America's Missile Age* Christopher Gainor explores the US Air Force s USAF decision in March 1954 to build the Atlas America s first ICBM Beginning with the story of the guided missiles that were created before and during World War II Gainor describes how the early Soviet and American rocket programs evolved over the course of the following decade He argues that the USAF was wrongly criticized for unduly delaying the start of its ICBM program endangering national security and causing America embarrassment when a Soviet ICBM successfully put Sputnik into orbit ahead of any American satellite Shedding fresh light on the roots of America s space program and the development of US strategic forces *The Bomb and America's Missile Age* uses evidence uncovered in the past few decades to set the creation of the Atlas ICBM in its true context not only in the America of the postwar years but also in comparison with the real story of the Soviet missiles that propelled the space race and the Cold War Aimed at readers interested in the history of the Cold War and of space exploration the book makes a major contribution to the history of rocket development and the nuclear age

History of the Office of the Secretary of Defense Alfred Goldberg,Steven L. Rearden,1984

A History of U.S. Nuclear Testing and Its Influence on Nuclear Thought, 1945-1963 David M. Blades,Joseph M. Siracusa,2014-05-01 The story of U S nuclear testing between 1945 and 1963 is a vivid and exciting one but also one of profound importance It is a story of trailblazing scientific progress weapons of mass destruction superpower rivalry accidents radiological contamination politics and diplomacy The testing of weapons that

defined the course and consequences of the Cold War was itself a crucial dimension to the narrative of that conflict Further the central question Why conduct nuclear tests was fully debated among American politicians generals civilians and scientists and ultimately it was victory for those who argued in favor of national security over diplomatic and environmental costs that normalized nuclear weapons tests A History of U S Nuclear Testing and Its Influence on Nuclear Thought 1945 1963 is an examination of this question beginning with the road to normalization and later de normalization of nuclear testing leading to the Nuclear Test Ban Treaty in 1963 As states continue to pursue nuclear weaponry nuclear testing remains an important political issue in the twenty first century **To Defend and Deter** John Clayton Lonnquest,1996

Defense's Nuclear Agency, 1947-1997 Christian Brahmstedt,2002 *Revolt of the Admirals* Jeffrey G. Barlow,1994 Chronicles in compelling detail the historic showdown between the U S Air Force and the Navy over the role of carrier aviation in the national security framework of the United States *Germany and Nuclear Weapons in the 21st Century* Ulrich Kühn,2024-03-12 This book is the first scholarly book to take a comprehensive look at Germany's nuclear weapons policies in the 21st century German foreign and security policy is facing a profound reorientation Great power competition between the United States and both a revanchist Russia and a rising China the return of war and nuclear threats to Europe and the emergence of new technologies all force Germany to adapt German policymakers and scholars increasingly speak of a pivotal Zeitenwende an epochal turning point in history How does Germany adapt its nuclear policies to these changing conditions The volume brings together internationally renowned nuclear scholars and policy analysts from Germany and abroad Focussing on German nuclear deterrence arms control and disarmament as well as nonproliferation policies the contributors assess how German leaders have navigated continuity and change domestically and abroad The volume concludes that Germany remains bound by dependence on the United States and its own conservatism Within these parameters German leaders have adapted slowly to change and continue to balance seemingly contradictory deterrence and disarmament goals This book will be of much interest to students of nuclear proliferation security studies German politics and International Relations as well as policymakers The Oxford Companion to United States History Paul S. Boyer,Melvyn Dubofsky,2001 In this volume that is as big and as varied as the nation it portrays are over 1 400 entries written by some 900 historians and other scholars illuminating not only America's political diplomatic and military history but also social cultural and intellectual trends science technology and medicine the arts and religion Bulletin of the Atomic Scientists ,1990-10
