The Energy Security Dilemma David Bernell, Christopher A. Simon, 2016-04-14 This book analyzes the energy security of the United States its ability to obtain reliable affordable and sufficient supplies of energy while meeting the goals of achieving environmental sustainability and protecting national security The economic and national security of the United States is largely dependent upon fossil fuels especially oil Without significant changes to current practices and patterns of energy production and use the domestic and global impacts security economic and environmental are expected to become worse over the coming decades Growing US and global energy demands need to be met and the anticipated impacts of climate change must be avoided all at an affordable price while avoiding conflict with other nations that have similar goals Bernell and Simon examine the current and prospective landscape of American energy policy from tax incentives and mandates at the federal and state level to promote wind and solar power to support for fracking in the oil and natural gas industries to foreign policies designed to ensure that markets and cooperative agreements not armies navies and rival governments control the supply and price of energy resources They look at the variety of energy related challenges facing the United States and argue that public policies designed to enhance energy security have at the same time produced greater insecurity in terms of fostering rising and potentially unmet energy needs national security threats economic vulnerability and environmental dangers

KEY ISSUES

Context Somalia is a fragile state emerging from a protracted civil war In 1991 the government was toppled by armed opposition groups leading to implosion of the central government and devolution of power to administrative regions The Fund recognized the Federal Government of Somalia on April 12 2013 paving the way for staff to provide policy advice and technical assistance While Somalia has been welcomed back as an active member of the Fund it remains ineligible for financial assistance pending the clearance of its longstanding arrears The political and security situation remains challenging Complex clan politics and high turnover in the members of the economic team have undermined policymaking A new government took office on February 18 2015 and presidential elections are planned for September 2016 Key policy issues

The Article IV discussions focused on immediate and medium term actions for building institutions and policy frameworks for fiscal and financial management Specifically Capacity building and governance Concerted action is needed to build institutions and improve governance in order to support sustainable inclusive growth and poverty reduction In particular urgent efforts are required to set in place sound mechanisms and institutions to ensure that prospective natural resource wealth notably hydrocarbons is well managed Considerable donor assistance is required for helping Somalia to meet these daunting challenges Fiscal Decisive steps are necessary to build fiscal discipline underpinned by realistic budgeting and effective implementation systems including commitment controls The 2015 budget needs to be revised in light of revenue shortfalls An emergency revenue mobilization plan and an expenditure review are warranted Financial sector Efforts are needed to develop the currently rudimentary financial system Swift action is required so that remittances can be channeled through the international banking system Currency reform should not be implemented until prerequisites are in place Given the extent of dollarization and the absence of monetary policy instruments the central bank is unable to conduct monetary policy Past IMF advice The latest Article IV consultation was on November 13 1989 and focused on the low priority attached by the government in place then on the need for better controlling unproductive spending and on the need for better
