Huemer, Gerti Kappel, 2015-02-21 This textbook mainly addresses beginners and readers with a basic knowledge of object oriented programming languages like Java or C but with little or no modeling or software engineering experience thus reflecting the majority of students in introductory courses at universities Using UML it introduces basic modeling concepts in a highly precise manner while refraining from the interpretation of rare special cases After a brief explanation of why modeling is an indispensable part of software development the authors introduce the individual diagram types of UML the class and object diagram the sequence diagram the state machine diagram the activity diagram and the use case diagram as well as their interrelationships in a step by step manner The topics covered include not only the syntax and the semantics of the individual language elements but also pragmatic aspects i e how to use them wisely at various stages in the software development process To this end the work is complemented with examples that were carefully selected for their educational and illustrative value Overall the book provides a solid foundation and deeper understanding of the most important object oriented modeling concepts and their application in software development An additional website offers a complete set of slides to aid in teaching the contents of the book exercises and further e learning material Advanced Information Systems Engineering Workshops

John Krogstie, Haralambos Mouratidis, Jianwen Su, 2016-06-06 This book constitutes the thoroughly refereed proceedings of five international workshops held in Ljubljana Slovenia in conjunction with the 28th International Conference on Advanced Information Systems Engineering CAiSE 2016 in June 2016 The 16 full and 9 short papers were carefully selected from 51 submissions The associated workshops were the Third International Workshop on Advances in Services DEsign based on the Notion of CAPabiliy ASDENCA co arranged with the First International Workshop on Business Model Dynamics and Information Systems Engineering BumDISE the Fourth International Workshop on Cognitive Aspects of Information Systems Engineering COGNISE the First International Workshop on Energy awareness and Big Data Management in Information Systems EnBIS the Second International Workshop on Enterprise Modeling EM and the Sixth International Workshop on Information Systems Security Engineering WISSE *Human Error, Safety and Systems*

Development Philippe Palanque, Chris Johnson, 2006-04-11 Recent accidents in a range of industries have increased concern over the design development management and control of safety critical systems Attention has now focused upon the role of human error both in the development and in the operation of complex processes Human Error Safety and Systems Development gathers contributions from practitioners and researchers presenting and discussing leading edge techniques that can be used to mitigate the impact of error both system and human on safety critical systems Some of these contributions can be easily integrated into existing systems engineering practices while others provide a more theoretical and fundamental perspective on the issues raised by these kinds of interactive systems More precisely the contributions cover the following themes Techniques for incident and accident analysis Empirical studies of operator behaviour in safety critical systems Observational studies of safety critical systems Risk assessment techniques for interactive systems Safety

related interface design development and testing Formal description techniques for the design and development of safety critical interactive systems Many diverse sectors are covered including but not limited to aviation maritime and the other transportation industries the healthcare industry process and power generation and military applications This volume contains 20 original and significant contributions addressing these critical questions The papers were presented at the 7th IFIP Working Group 13.5 Working Conference on Human Error Safety and Systems Development which was held in August 2004 in conjunction with the 18th IFIP World Computer Congress in Toulouse France and sponsored by the International Federation for Information Processing IFIP
