Operational Intelligence for Health, Wellness, and Leadership Gamaliel Baer, David Schary, 2023-10-16 Operational Intelligence for Health Wellness and Leadership OIHWL addresses human behavior and the impact of lifestyle on the Big Three health outcomes of heart attack cancer and suicide It weaves together the concepts of resilience physical wellness nutritional wellness mental wellness and leadership OIHWL s model for behavior change is built using Aristotle s philosophy of responsibility OIHWL is designed to show the application of the behavioral change model throughout the book The result is a logically consistent and easy to follow framework that any firefighter can apply to their life and that any fire department can adopt and implement as education for its members This remains the case even if some or all of the hundreds of citations eventually age out because the model is true The final chapter presents an objective and thus assessable definition of leadership It aims to displace the decades of leadership theory that is subjective in nature and often indistinguishable from management theory Just as NFPA outlines categorically that certain fire apparatus are aerials and not engines there is a way to distinguish categorically between leadership and management OIHWL is the comprehensive guide for learning how to optimize behavior that is within your control

Resources in Education, 1982 **Cardiothoracic Surgery in the Elderly** Mark R. Katlic, 2011-05-04 Cardiothoracic Surgery in the Elderly Evidence Based Practice is an important and timely book that reflects the thoughtful work of pioneers in geriatric surgery. It encompasses their knowledge related to geriatric surgery and their reflections and guidance on the rapidly accumulating knowledge related to improving the health and surgical care of seniors. This book provides a scholarly review of the constantly expanding knowledge base about cardiovascular and thoracic surgery in seniors. The book follows a logical sequence covering general aspects of care: cardiac surgery and thoracic surgery. Chapters are focused on common devastating and often missed complications of surgical care in the seniors. These include delirium, depression, pressure sores, functional losses, incontinence, volume depletion, and asymptomatic or atypical complications: myocardial infarction, post-operative diarrhea, urinary tract infections, and pneumonia. Each is expertly reviewed. Strategies to help the surgeons and the surgical team anticipate, recognize, and effectively prevent or manage such problems are discussed, and the evidence basis for such strategies is provided. Cardiothoracic Surgery in the Elderly Evidence Based Practice is particularly timely and the first to review the substantial body of knowledge that has been developed in recent years related to geriatric cardiothoracic surgical problems. It catalogs well the expanding knowledge basis for achieving successful surgical outcomes in the very old. It provides a most useful resource for cardiovascular/thoracic surgeons in training and those already in practice.

Traditionally, for healthy individuals or athletes, it focused on strength, flexibility, or cardiovascular training. Such training would normally be supervised by a personal fitness trainer or strength and conditioning S/C coach. This book promotes a different approach in that the aim of training is to promote athletic development. 1. 2. From the perspective of sustainable athletic development, training is not

limited to strength flexibility or cardiovascular domains but also focuses on the fundamental A B Cs of agility balance and coordination as a foundation for enhanced movement literacy 3 Provided by publisher Lifestyle Medicine Jeffrey I. Mechanick, Robert F. Kushner, 2016-03-18 Lifestyle the manner in which people live is fundamental to health wellness and prevention of disease It follows that attention to lifestyle is critically important to effective and successful health care But here s the challenge health care professionals receive very little if any formal training about lifestyle counseling and therefore are ill equipped to incorporate lifestyle issues into clinical practice In response Lifestyle Medicine is evolving as a means to fill this knowledge gap Lifestyle medicine approaches health and wellness by harnessing the power of lifestyle related behaviors and influencing the environment we live in It is a formal approach that promises to enhance and strengthen a re invigorated health care system that is still outpaced by the epidemic proportions and complexity of chronic diseases like obesity diabetes depression hypertension and cancer among others Lifestyle Medicine A Manual for Clinical Practice presents this formal approach in a pragmatic context This unique and practical manual provides clear and succinct guidance on nearly all aspects of lifestyle medicine The approach is both explanatory and pragmatic providing case studies and bulleted translation of academic information into clinical practice recommendations There is an emphasis on scientific evidence wherever possible as well as opinions by the expert chapter authors who practice lifestyle medicine There is a how to rationality to the book consistent with a premise that any and all health care professionals should and perhaps must incorporate lifestyle medicine A valuable checklist is included at the close of the book that summarizes key points and provides a practical tool for routine patient encounters *Pfeiffer and Mangus's Concepts of Athletic Training* Cynthia Trowbridge, Cheryl M. Principles and Practice of Geriatric Surgery Ronnie Ann Rosenthal,Michael E. Zenilman,Mark R. Katlic,2011-07-12 In the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients This is a useful book that deserves to do well I hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field **NEJM Book Review**
