Used Cars Sell By Owner:

Automotive Executive ,1988 Male Car Owners' Perception and Buying Behaviour Dr. G. Yoganandan, Mr. E. Pugazh, 2015-03-03 About the book Indian passenger car industry is considered as the mother industry for many other industries Industries like rubber paint glass electrical and electronics industries get lot of demand from the passenger car industry and thereby they prosper or suffer along with car industry The growth of Indian car industry can be associated with the fact that the India's strong engineering base and expertise in the manufacturing of low cost fuel efficient cars has resulted in the expansion of manufacturing facilities of several multinational automobile giants like BMW Mercedes Benz Hyundai Nissan Toyota Volkswagen and Maruti Suzuki Also it should be noted that the new generation of employees who constituted the major chunk of the Indian middleclass exhibited more spending orientation rather than saving orientation The car was once considered as a luxury item but slowly people started treating it as a facility The Indian car buyers are price conscious and also expect less maintenance expense and low running cost Therefore the people always have to think whether to go for petrol or diesel car since the petrol car is cheaper in terms of initial purchase price and low maintenance cost but on the other hand a diesel car is cheaper in terms of higher mileage and also cheaper fuel price until now The book focuses on the study that aimed at finding out the change in buying behavior of customers towards purchase of cars and their perception towards petrol and diesel cars This book would be handy to researchers undergraduate and postgraduate students belonging to management studies commerce economics and sociology disciplines to understand the buying behavior through a real world case study Hearings United States. Congress Senate, 1959 *Hearings* United States. Congress. Senate. Committee on Commerce, 1954 Financial Macroeconomics Jan A. Kregel, 2024-08-13 The title of this book may seem to confuse two separate disciplines finance and macroeconomics However it is based on the fact that finance and macroeconomics were integrated at least in their formative years It is a natural extension of a line of research that dominated monetary theory in the early part of the 20th century Economists such as Keynes Robertson Hawtrey Fisher Hayek and Schumpeter sought to blend the analysis of business cycles with their often first hand experience of money and financial markets The result was a monetary theory that provided the fertile background to what came to be called macroeconomics However in the post war period the monetary aspects of this theory dropped out of sight in the neo classical synthesis and hydraulic Keynesianism Post Keynesians such as Davidson and Minsky have done much to try to restore the monetary aspects of the theory but the other more technical aspects of financial analysis have been ignored This book aims to show how technical aspects of finance were initially part of the early investigations of macroeconomics and how they may be used to provide a realistic analysis of the behavior of modern financial economies The Horseless Age ,1917
