

Sea Star Virtual Dissection

- Use a large, sharp scalpel to cut through the sea star's central disc, making approximately four equal length incisions that divide the animal into four equal parts.
- Cut each arm in half, right below the upper part and above the first dissection. Then remove each arm and place them in a petri dish. Adjust the petri dish as needed. A strong fluorescent light source is best when these dissections are viewed. They may become very dark, and not transparent.

External Anatomy

1. What is the name of the central disc? central disc
2. What is the name of the arms? arms
3. The slightly raised, central structure that sits on the surface is called the apical system. It is located in the top of each arm and the central disc.
4. Remove the disc (propagula) carefully.
5. Remove another part (propagula) carefully.

External anatomy table below _____

Internal Systems

1. The visible lines in the propagula are called radial canals.
2. Each arm has a radial canal in the center of the arm.
3. Each arm has a radial canal in the center of the arm.
4. Label the different systems.

Metazoa - Morphology and Evolution of Animals Achim Paululat, Günter Purschke, 2025-08-23 Over the course of evolution multicellular animals Metazoa have successfully colonized every conceivable habitat on our planet thanks to their ability to survive and adapt under adverse or changing conditions But how is an animal's body structured to accomplish this What organs do animals have how do they perceive their environment and what is the evolutionary relationship between these seemingly so different organisms This volume designed as a modern practical book presents the most important body plans of selected animals It is intended to help all Biology students to recognize and understand the basic body shapes and structures in the respective animal groups including the main features that have contributed to their evolutionary success the similarities and differences and the many different solutions that evolution has come up with for given biological problems The authors have consistently used focused compact text and photographs that not only show the animals most important external features but also explain the dissection process step by step The authors hope that this new book will help all Biology students successfully complete their practical zoology course and gain new insights into the morphology and evolution of animals Biology, 1999 **School Library Journal**, 1985 *Biology/science Materials* Carolina Biological Supply Company, 1991 Carolina Science and Math Carolina Biological Supply Company, 2003 **Laboratory Studies in Integrated Zoology** Frances Miller Hickman, Cleveland P.
